Foundations Of The Everyday Shock Deferral Repetition Philosophical Projections:

Foundations of the Everyday Eran Dorfman, 2014 A highly original and interdisciplinary study of the philosophy of the **Entropic Philosophy** Shannon M. Mussett, 2022-01-31 Now is a time of tremendous anxiety about the present and future state of the world As the second law of thermodynamics states entropy never decreases time marches relentlessly forward and closed systems inevitably break down Entropy serves as a powerful metaphor capturing expressions of growing malaise and decline Entropic Philosophy Chaos Breakdown and Creation builds on the meaning of entropy from the Greek entropia signifying a turning toward or transformation Developing a philosophy of entropy this book draws variously from anthropology psychoanalysis literature art and the history of philosophy This approach opens pathways for reverence and care that are crucial in preventing fear existential inertia and despair The Work of Forgetting Stephane Symons, 2018-12-14 For over fifty years the concept of memory has played a crucial role in a large number of academic and societal debates The Work of Forgetting Or How Can We Make the Future Possible draws attention to the limits of the academic field of memory studies It argues that the faculty of memory offers an inadequate response to the challenges of the present The book sets up a dialogue between the philosophies of forgetting that underlie the writings of Friedrich Nietzsche Walter Benjamin and Gilles Deleuze and the philosophies of memory that inform the work of Sigmund Freud Martin Heidegger and Hannah Arendt It builds on the idea that history is inseparable from a type of transience that cannot be counter acted by the preserving work of memory and develops a new understanding of the phenomenon of forgetting in which the passage of time is asserted in thought and thus made productive Political Loneliness Jennifer Gaffney, 2020-07-07 Political Loneliness Modern Liberal Subjects in Hiding examines the loneliness that remains at work in modern life even as we find ourselves increasingly interconnected While much has been said about this experience in the main currents of continental philosophy this book opens new paths within this discourse by developing the problem of loneliness in a political register. The central claim of this book is that neoliberal subjectivity has rendered us lonely Drawing especially on the work of Hannah Arendt the author suggests that the political structures we have inherited from the liberal tradition such as the anonymity of the vote and the right to pursue one s private self interest as far as possible have left us hidden from one another unable to appear as members of a common world. The author further argues that it is precisely this experience of political loneliness that renders citizens in liberal and allegedly open societies desperate to belonging and willing in turn to surrender to delusional fellowships like totalitarianism By developing the problem of loneliness in a political register this book offers a framework for interpreting the rise of totalitarianism at the beginning of the twentieth century no less than the recent ascendance of right wing populism in Western liberal democracies today It thus makes an important contribution to debates in current continental philosophy liberal political theory and critical theory regarding issues of alienation political life and community in the present age Nancy, Blanchot Leslie Hill, 2018-09-30 The concept of

community is one of the most frequently used and abused of recent philosophical or socio political concepts In the 1980s faced with the imminent collapse of communism and the unchecked supremacy of free market capitalism the philosopher Jean Luc Nancy in The Inoperative Community and the writer Maurice Blanchot in The Unavowable Community both thought it essential to rethink the fundamental basis of community as such More recently Nancy has renewed the debate by unexpectedly attacking Blanchot's account of community claiming that it embodies a dangerously nostalgic desire for mythic and religious communion This book examines the history and implications of this controversy It analyses in forensic detail Nancy's and Blanchot's contrasting interpretations of German Romanticism and the work of Heidegger Bataille and Marguerite Duras and examines closely their divergent approaches to the contradictory legacy of Christianity At a time when politics are increasingly inseparable from a deep seated sense of crisis it provides an incisive account of what in the concept of community is thought yet crucially still remains unthought The Thought of Matter Richard A. Lee Jr., 2015-12-18 Discussions of materialism have exploded in recent years From the speculative realism materialism of Quentin Meillassoux to the New Materialism of many modern Marxisms the interest in a return to or rehabilitation of materialism is on the rise What is not analyzed in many of these discussions however is a trenchant methodological and metaphysical problem lying at the basis of any philosophical materialism if matter is simply that which is other than thought then how can it be thought without drawing it away from its materiality On the other hand if one assumes a direct access to matter to this other what are the conditions of that access Are they material conditions or cognitive thought conditions Does what would present itself immediately present at the same time the conditions that allow it to be presented If not then we are closer to a theology of matter and further from a philosophical materialism The Thought of Matter investigates this metaphysical and methodological problem through Aristotle Marx Adorno Althusser Duns Scotus Hobbes and Benjamin in order to show that a philosophical materialism necessarily requires the concepts and tools of thought in order to allow the otherness of matter to On the Brink Werner Hamacher, 2020-08-27 This collection of essays by one of the foremost emerge in its own materiality figures in contemporary theory takes as its theme the edge or limit between language time history and politics These are essays that are all on the brink the very extreme at which one can no longer define where one is located neither on the cliff say nor over the edge To be on the brink is to take up that extreme limit the point of contamination or indetermination where language time history and politics all converge upon one another On the Brink begins with a consideration of Kant s treatment of time as representation and of Hegel's treatment of the writing of history and the end of art all while taking up other key figures in the history of philosophy The book then moves to an exploration of language in a variety of manifestations from translation to complaint and greeting It concludes by analyzing political and social questions that continue to haunt us today the conception of work not least in National Socialism and our relationship to democracy Taken together Werner Hamacher's essays offer trenchant historical political and rhetorical interventions into the history of

philosophy literature and our contemporary political situation
