Four Crises And A Peace Process American Engagement In South Asia:

Four Crises and a Peace Process P. R. Chari, Pervaiz Iqbal Cheema, Stephen P. Cohen, 2009-03-19 India and Pakistan nuclear neighbors and rivals fought the last of three major wars in 1971. Far from peaceful, however, the period since then has been one long crisis punctuated by periods of peace. The long disputed Kashmir issue continues to be both a cause and consequence of India-Pakistan hostility. *Four Crises and a Peace Process* focuses on four contained conflicts on the subcontinent: the Brasstacks Crisis of 1986-1987, the Compound Crisis of 1990, the Kargil Conflict of 1999, and the Border Confrontation of 2001-2002. Authors P. R. Chari, Pervaiz Iqbal Cheema, and Brookings senior fellow Stephen P. Cohen explain the underlying causes of these crises, their consequences, the lessons that can be learned, and the American role in each. The four crises are notable because any one of them could have escalated to a large-scale conflict or even all-out war, and three took place after India and Pakistan had gone nuclear. Looking for larger trends of peace and conflict in the region, the authors consider these incidents as cases of attempted conflict resolution, as instances of limited war by nuclear-armed nations, and as examples of intervention and engagement by the United States and China. They analyze the reactions of Indian, Pakistani, and international media and assess the two countries' decision-making processes. *Four Crises and a Peace Process* explains how these crises have affected regional and international policy and evaluates the prospects for lasting peace in South Asia.

Four Crises and a Peace Process P. R. Chari, Pervaiz Iqbal Cheema, Stephen P. Cohen, 2008 South Asia has been called one of the most dangerous regions in the world while India and Pakistan nuclear neighbors and rivals fought the last of their three major wars in 1971. The period since then has been one long crisis punctuated by periods of peace. The long disputed Kashmir issue continues to be both a cause and consequence of India-Pakistan hostility. *Four Crises and a Peace Process* focuses on four contained conflicts on the subcontinent since 1971: the Brasstacks Crisis of 1986-87, the Compound Crisis of 1990, the Kargil Conflict of 1999, and the Border Confrontation Crisis of 2001-02. Each might have escalated to large-scale conflict but did not. Additionally, each was linked to the introduction of nuclear weapons into the arsenals of India and Pakistan. *Four Crises and a Peace Process* explains how these crises have affected regional and international policy and it evaluates the current prospects for lasting peace in South Asia. **Asia's New Geopolitics**

Desmond Ball, Lucie Béraud-Sudreau, Tim Huxley, C. Raja Mohan, Brendan Taylor, 2021-09-28 Intensifying geopolitical rivalries, rising defence spending, and the proliferation of the latest military technology across Asia suggest that the region is set for a prolonged period of strategic contestation. None of the three competing visions for the future of Asian order—a US-led Free and Open Indo-Pacific, a Chinese-centred order, or the ASEAN-inspired Indo-Pacific Outlook—is likely to prevail in the short to medium term. In the absence of a new framework, the risk of open conflict is heightened, and along with it, the need for effective mechanisms to maintain peace and stability. As Asia's leaders seek to rebuild their economies and societies in the wake of COVID-19, they would do well to reflect upon the lessons offered by the pandemic and their applicability in the

strategic realm The societies that have navigated the crisis most effectively have been able to do so by putting in place stringent protective measures Crisis management and avoidance mechanisms and even in the longer term wider arms control can be seen as the strategic equivalent of such measures and as such they should be pursued with urgency in Asia to reduce the risks of an even greater calamity

Nuclear Reactions Mark S. Bell, 2021-04-15 Nuclear Reactions analyzes how nuclear weapons change the calculations states make in their foreign policies why they do so and why nuclear weapons have such different effects on the foreign policies of different countries Mark S Bell argues that nuclear weapons are useful for more than deterrence They are leveraged to pursue a wide range of goals in international politics and the nations that acquire them significantly change their foreign policies as a result Closely examining how these effects vary and what those variations have meant in the United States the United Kingdom and South Africa Bell shows that countries are not generically emboldened they change their foreign policies in different ways based on their priorities This has huge policy implications What would Iran do if it were to acquire nuclear weapons Would Japanese policy toward the United States change if Japan were to obtain nuclear weapons And what does the looming threat of nuclear weapons mean for the future of foreign policy Far from being a relic of the Cold War Bell argues nuclear weapons are as important in international politics today as they ever were Thanks to generous funding from the University of Minnesota and its participation in TOME the ebook editions of this book are available as Open Access volumes available from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Atomic Friends Zachary Keck, 2022-08-29 Should the United States prevent additional allies from developing atomic weapons Although preventing U S allies and partners from acquiring nuclear weapons was an important part of America's Cold War goals in the decades since Washington has mostly focused on preventing small

adversarial states from building the bomb This has begun to change as countries as diverse as Germany Japan South Korea Turkey and Saudi Arabia among others have begun discussing the value of an independent nuclear arsenal Their ambitions have led to renewed discussion in U S foreign policy circles about the consequences of allied proliferation for the United States Even though four countries have acquired nuclear weapons this discussion remains abstract theoretical and little changed since the earliest days of the nuclear era Using historical case studies this book shines a light on this increasingly pressing issue Keck examines the impact that acquiring nuclear arsenals had after our allies developed them He examines existing and recently declassified documents original archival research and for the Israel and especially Pakistan cases interviews with U S officials who worked on the events in question *Pakistan at Seventy* Shahid Burki,Iftekhhar Ahmed Chowdhury,Asad Butt,2019-06-07 This handbook examines Pakistan s 70 year history from a number of different perspectives When Pakistan was born it did not have a capital a functioning government or a central bank The country lacked a skilled workforce While the state was in the process of being established eight million Muslim refugees arrived from India who had to be absorbed into a population of 24 million people However within 15 years Pakistan was the fastest growing and transforming economy in the developing world although the political evolution of the country during this period was not equally successful Pakistan has vast agricultural and human resources and its location promises trade investment and other opportunities Chapters in the volume written by experts in the field examine government and politics economics foreign policy and environmental issues as well as social aspects of Pakistan s development including the media technology gender and education Shahid Javed Burki is an economist who has been a member of the faculty at Harvard University USA and Chief Economist Planning and Development Department Government of the Punjab He has also served as Minister of Finance in the Government of Pakistan and has written a number of books and journal and newspaper articles He joined the World Bank in 1974 as a senior economist and went on to serve in several senior positions He was the first Director of the China Department 1987 94 and served as the Regional Vice President for Latin America and the Caribbean during 1994 99 He is currently the Chair of the Board of Directors of the Shahid Javed Burki Institute of Public Policy at NetSol BIPP in Lahore Iftekhhar Ahmed Chowdhury is a career Bangladeshi diplomat and former Minister of Foreign Affairs in the Government of Bangladesh 2007 08 He has a PhD in international relations from the Australian National University Canberra He began his career as a member of the civil service of Pakistan in 1969 Dr Chowdhury has held senior diplomatic positions in the course of his career including as Permanent Representative of Bangladesh to the United Nations in New York 2001 07 and in Geneva 1996 2001 and was ambassador to Qatar Chile Peru and the Vatican He is currently a visiting senior research fellow at the Institute of South Asian Studies National University of Singapore Asad Ejaz Butt is the Director of the Burki Institute of Public Policy Lahore Pakistan **Avoiding Armageddon** Bruce Riedel,2013-01-29 India and Pakistan will be among the most important countries in the twenty first century In *Avoiding Armageddon* Bruce Riedel clearly explains the challenge and

the importance of successfully managing America's affairs with these two emerging powers and their toxic relationship Born from the British Raj the two nations share a common heritage but they are different in many important ways India is already the world's largest democracy and will soon become the planet's most populous nation Pakistan soon to be the fifth most populous country has a troubled history of military coups dictators and harboring terrorists such as Osama bin Laden The longtime rivals are nuclear powers with tested weapons They have fought four wars with each other and have gone to the brink of war several times Meanwhile U.S. presidents since Franklin Roosevelt have been increasingly involved in the region's affairs In the past two decades alone the White House has intervened several times to prevent nuclear confrontation on the subcontinent South Asia clearly is critical to American national security and the volatile relationship between India and Pakistan is the crucial factor determining whether the region can ever be safe and stable Based on extensive research and Riedel's role in advising four U.S. presidents on the region *Avoiding Armageddon* reviews the history of American diplomacy in South Asia the crises that have flared in recent years and the prospects for future crisis Riedel provides an in depth look at the Mumbai terrorist attack in 2008 the worst terrorist outrage since 9/11 and he concludes with authoritative analysis on what the future is likely to hold for America and the South Asia puzzle as well as recommendations on how Washington should proceed
