Muller, 1997-01-01 This program is an electronic adaptation of work on the Comprehensive Classification of Pelvic Fractures by M Tile D Helfet J Kellam B Isler S Nazarian R J Judet E Letournel and M E Muller It includes sample X rays CT slices and 3D movies In addition a complete dictionary explains important terms and concepts and a database is provided to record individual patient data such as fracture code dates of treatment and evaluation information Multiple queries may be performed by fracture code or other criteria to retrieve an individual patient With the use of this program careful classification and accurate documentation of treated fractures will facilitate research into the effectiveness of treatment **Fractures of the Acetabulum** Emile Letournel, Robert Judet, 2012-12-06 At the request of our publishers I accepted the task of preparing this second edition I felt this was necessary for several reasons new imaging technologies such as CT scanning and 3 D reconstructions are now used routinely the indications for employing improved approaches are

clearer and reconstructions are facilitated by new internal fixation devices Above all I thought it was time to report the long term results of the 940 acetabular fractures 90070 of which were treated surgically a unique series In spite of the experience acquired from the three previous reviews of cases 1966 1971 and 1978 I failed to foresee the amount of time this revision would need In fact it took more than 3 years to follow up the larger number of cases and 159 patients out of 800 i e 22.7% were not included as they had moved since their last review and simply could not be located At a time when it is in fashion to evaluate the cost of health care it is strange to see how public administrators so keen on evaluating the immediate cost of our operations do not care about the quality of their long term results which appears to us however to be the best basis for the choice of the initial treatment

**Fractures of the Acetabulum** E. Letournel, R. Judet, 2014-03-12 It has been a pleasure to comply with requests to publish this book in English During the intervening years there has been little to add to our views as to the best management of acetabular fractures but an additional chapter has been incorporated comprising recent findings in our patients and slight changes in emphasis on the indications for operations Additionally having recognised that one of the greatest difficulties in this method of treatment lies in the pre operative assessment of the standard radiographs we have prepared a short series of radiographs which the reader may find advantageous for study We are grateful to Mr Reginald Eison who has translated and revised the French edition Considerable alteration of the text and the general presentation was necessary in order to make the material palatable in English Our thanks are due to our new publishers Springer Verlag for their keen interest and skill

E LETOURNEL R JUDET Preface to the French Edition It is a long time since we first attempted surgical treatment of fractures of the acetabulum accompanied by displacement with the aim of restoring perfect articulation Such treatment demands an exact reconstitution of the anatomy of the acetabulum and pelvic bone This volume comprises an account of our efforts to assess the place of open reduction and internal fixation of displaced

fractures of the acetabulum The principal aim is simple the perfect restoration of the articular surface and the associated bony architecture     International Survey of Surgery ,1924     **The Pennsylvania Medical Journal** ,1904
