nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a
surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory
StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this
dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations
acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities
including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their
own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose
that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a
project by an acronym which already has too many meanings or confused definitions *Bi-ennial Report of the Board of*
