Lockwood, 2015-04-18 In this dynamic look at the current state of character education Alan Lockwood assesses its strengths and weaknesses and finds fault with leading advocates for failing to respond to sound critiques of their work Lockwood

argues that contemporary character education can be significantly improved by using key principles from established theories and research on developmental psychology. He offers numerous examples to support his recommendations while inviting character education theorists and practitioners to generate their own implications from his presentation. For anyone interested in improving the quality of values based education for children and adolescents, this book elaborates an alternative view of values education that is critical to pursuing a mission to promote good citizenship. Explains what contemporary character education is, identifying its strengths and addressing its major criticisms. Offers recommendations for curriculum and instruction that systematically take into account developmental perspectives. Alan L. Lockwood is professor of Curriculum and Instruction at the University of Wisconsin-Madison. Brimming with fresh insights on almost every page, Alan Lockwood challenges contemporary character education's fundamental assumptions and proposes a coherent perspective to guide more defensible and effective programs. This is a significant addition to theory and practice in the field of character education.

James S. Leming, Carl A. Gerstaecker, Chair in Education, Saginaw Valley State University. Educational Psychology. Elizabeth Anne Jordan, Marion Porath, 2006. Educational psychology: a problem-based approach presents concepts through the use of problem-based scenarios so that students can construct knowledge about the needs and learning of children and adolescents. Developed for faculty who wish to use a problem-based approach, this text covers basic content and theories providing students with a well-rounded, decision-based introduction to the discipline. Written in a narrative style, this text is extremely readable and eases the transition from a discussion of theory to the reality of practice. The text is developmental in focus, highlighting the specific needs of early and middle childhood and adolescence. It is particularly well-suited to studying the educational implications of theories of development and the challenges of children and adolescents with developmental, social, emotional, and/or learning challenges. The text was developed based on many real scenarios that mirror events students will see in all multicultural, inclusive elementary, middle, and secondary classrooms. Scenarios are often revisited to illustrate the complexity of situations and present a holistic perspective on development. Publisher: *Handbook of Psychology, Educational Psychology*. William M.
