Media and Print Culture Consumption in Nineteenth-Century Britain

Paul Raphael Rooney, Anna Gasperini, 2016-10-27 This book explores Victorian readers consumption of a wide array of reading matter Established scholars and emerging researchers examine nineteenth century audience encounters with print culture material such as periodicals books in series cheap serials and broadside ballads Two key strands of enquiry run through the volume First these studies of historical readership during the Victorian period look to recover the motivations or desired returns that underpinned these audiences engagement with this reading matter Second contributors investigate how nineteenth century reading and consumption of print was framed and or shaped by contemporaneous engagement with content disseminated in other media like advertising the stage exhibitions and oral culture

Garden Plants Taxonomy Bijan Dehgan, 2023-04-05 Horticulture has remained far behind in understanding of botanical principles Recent phylogenetic DNA based reorganization of higher plants has revolutionized taxonomic treatments of all biological entities even when morphology does not completely agree with their organization This book is an example of applying principals of botanical phylogenetic taxonomy to assemble genera species and cultivars of 200 vascular plant families of ferns gymnosperms and angiosperms that are cultivated for enhancement of human living space homes gardens and parks The emphases are on cultivated species but examples of some plants are often shown in the wild and in landscapes In providing descriptions it is assumed that students and other interested individuals have no background in general botany plant characteristics or nomenclature Fundamental features of all plant groups discussed are fully illustrated by original watercolor drawings or photographs Discussion of the families is grounded on recent botanical phylogenetic treatments which is based on common ancestry monophyly Of course phylogenetic taxonomy is not a new concept and was originally based on morphological characteristics it is the DNA based phylogeny that has revolutionized modern biological

classifications In practical terms this book represents the horticultural treatment that corresponds to phylogenetic based botanical taxonomy to which is added cultigens and cultivated genera and species Hence the harmony between horticultural and botanical taxonomy This book covers phylogenetic based taxonomy of Angiosperms Eudicots A companion volume covers Ferns Gymnosperms and Angiosperms Monocots **The Harvard Classics: The autobiography of Benjamin Franklin;**
