Joint Force Quarterly ,2009 **Enhancing Army S&T** ,2007 **Enhancing Army S&T: Lessons from Project Hindsight Revisited** Richard Chait,John Lyons,Duncan Long,Albert Sciarretta,National University,2012-07-05 The urge to maintain military superiority over potential adversaries has long been a driver of technological advancement This interplay between defense strength and technology so evident in the nature of America s military power has for decades prompted U S defense planners to engage in technology forecasting Analysis of emerging technologies was and is vital to making wise defense investments While it is important to assess the needs and challenges of the future understanding past military technological successes can be equally important to Army S T investment and management By studying past technology development for weapons systems one can see what factors were important for success and apply these lessons to the management of S T1 for future systems This is an especially valuable exercise now because in recent years there has been mounting pressure to transfer much of the execution of technical work away from the military s inhouse S T laboratories to the private sector Whatever the merits of such a move it represents a significant change from past practices It would be unwise to undertake any fundamental shifts without first understanding just what was successful about the way the Army S T program has done business in past years This book draws on a series of studies known as Project Hindsight Revisited conducted by the authors at the National Defense University NDU from 2004 2006 The Project Hindsight Revisited studies examined in three reports the development of four current weapons systems of the U S Army the Abrams main battle tank 2 the Apache attack helicopter 3 the Stinger anti aircraft missile 4 and the Javelin anti tank missile In exploring how these weapons systems were taken from conceptual design to full scale production the studies brought to light crucial factors in their successful development This book will pursue significant implications of the studies findings In exploring these findings we hope to make a contribution to answering a question that is of the utmost importance to the Army leadership how are S T resources best used to advance the state of the art capabilities of U S Army weapons systems **Bulletin of the Atomic Scientists** ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Congressional Record Index** ,1988 Includes history of bills and resolutions

Enhancing Army S&T: Vol. II: the Future John W. Lyons,Richard Chait,National Defense University,2012-07-05 Offers an updated view of earlier work with an emphasis on the relative roles played by the Army laboratories and the contractors that manufactured the systems The close collaboration between the two groups was judged by us to be the key to the successful outcomes Both the Army laboratories and the technical personnel at the contractors were essential without either group the work would have cost more taken more time and might well have failed Project Hindsight United States.
