Enlightenment Interrupted The Lost Moment Of German Idealism And The Reactionary Present:

Enlightenment Interrupted Michael Steinberg, 2014-06-27 For most of the eighteenth century the best minds in Europe took up the task of providing a foundation for human life and human society in which individual fulfillment was to be achieved within a rational public order When it became apparent that this task was based on an illusion the separation of self and world and was thus doomed to failure however that insight and the consequent crisis were forgotten and repressed After 1815 all parties reactionary and liberal chose to proceed as if we had achieved what we knew somewhere we could not carry off To secure that false confidence the challenges of the late Enlightenment had to be silenced and its doubts swept under the carpet This book concerns a founding act of bad faith and of willed blindness the self forgetting of the rootlessness and the falsity of the basic presuppositions of the modern world that have haunted that world from its birth Enlightenment Interrupted takes the metaphysical arguments of the idealists seriously Its methodological foundation is the belief that in every era there are deep structures of thought and experience that define the range of theoretical and political possibilities available The great achievement of the post Kantian generation was to critique and ultimately to move beyond the self world dichotomy at the heart of Western thought This can be seen as a continuation of the Enlightenment project of subjecting everything to the test of reason but it was also part of a larger cultural movement that found expression in Romanticism in an openness to Indian and other non Western thought and in the political and social experimentation of the French Revolution What followed in the post Revolutionary years was not a development of those tendencies to openness and egalitarian common process but a retreat to the opposition of self and world and a drastic reduction in intellectual and social possibilities This is one source of the collective impotence that sees the twenty first century in a lockstep march to disaster

After Kant Michael Sonenscher, 2023-07-11 A reflection on the legacy of money law and history in modern political thought **Enlightening enthusiasm** Lionel Laborie, 2015-10-01 In the early modern period the term enthusiasm was a smear word used to discredit the dissenters of the radical Reformation as dangerous religious fanatics In England the term gained prominence from the Civil War period and throughout the eighteenth century Anglican ministers and the proponents of the Enlightenment used it more widely against Paracelsian chemists experimental philosophers religious dissenters and divines astrologers or anyone claiming superior knowledge But who exactly were these enthusiasts What did they believe in and what impact did they have on their contemporaries This book concentrates on the notorious case of the French Prophets as the epitome of religious enthusiasm in early Enlightenment England Based on new archival research it retraces the formation development and evolution of their movement and sheds new light on key contemporary issues such as millenarianism censorship and the press blasphemy dissent and toleration and madness *Fichte's Addresses to the German Nation Reconsidered* Daniel Breazeale, Tom Rockmore, 2016-08-30 Essays on one of J G Fichte s best known and most controversial works One of J G Fichte s best known works Addresses to the German Nation is based on a series of speeches

he gave in Berlin when the city was under French occupation They feature Fichte's diagnosis of his own era in European history as well as his call for a new sense of German national identity based upon a common language and culture rather than blood and soil These speeches often interpreted as key documents in the rise of modern nationalism also contain Fichte's most sustained reflections on pedagogical issues including his ideas for a new egalitarian system of Prussian national education The contributors' reconsideration of the speeches deal not only with technical philosophical issues such as the relationship between language and identity and the tensions between universal and particular motifs in the text but also with issues of broader concern including education nationalism and the connection between morality and politics *Karl*

Leonhard Reinhold and the Enlightenment George di Giovanni, 2010-07-24 Karl Leonhard Reinhold 1757-1823 is a complex figure of the late German Enlightenment Sometime Catholic priest and active Mason even when still a cleric in Vienna early disciple of Kant and the first to try to reform the Critique of Reason influential teacher and prolific author astute commentator on the immediate post-Kantian scene and at all times convinced propagandist of the Enlightenment in all these roles Reinhold reflected his age but also tested the limits of the values that had inspired it This collection of essays originally presented at an international workshop held in Montreal in 2007 conveys this multifaceted figure of Reinhold in all its details In the four themes that run across the contributions the historicity of reason the primacy of moral praxis the personalism of religious belief and the transformation of classical metaphysics into phenomenology of mind Reinhold is presented as a catalyst of nineteenth-century thought but also as one who remained bound to intellectual prejudices that were typical of the Enlightenment and for this reason as still the representative of a past age The volume contains the text of two hitherto unpublished Masonic speeches by Reinhold and a description of recently recovered transcripts of student lecture notes dating to Reinhold's early Jena period **The Philosophy of the Enlightenment (Routledge Revivals)** Lucien

Goldmann, 2009-11-02 In this reissue originally published in English in 1973 French philosopher Lucien Goldmann turns his attention to the Enlightenment of the eighteenth century the great age of liberalism and individualism and analyses the mental structures of the outlook of the philosophes who showed that the ancien régime and the privileges of the Church were irrational anachronisms In assessing the strengths and limitations of individualism Goldmann considers the achievements and limitations of the Enlightenment He discusses the views of Hegel and Marx and examines the relation between liberal scepticism and traditional Christianity to point the way to the possible reconciliation of the two seemingly incompatible world visions of East and West today **Enlightenment, Revolution, and Romanticism** Frederick C.
