Amplifying the Curriculum Áida Walqui, George C. Bunch, Peggy Mueller, 2025. Expanded and revised to include four entirely new chapters, this thoroughly updated edition presents a model for how educators can design high-quality, challenging, and supportive learning opportunities for multilingual learners. Starting with the premise that conceptual, analytic, and language practices develop simultaneously as students engage in disciplinary learning, the authors argue for instruction that amplifies rather than simplifies expectations, concepts, texts, and learning tasks. They offer clear guidance for designing well-supported lessons with examples that demonstrate the approach in elementary and secondary classrooms across various subject areas: math, science, language arts, and social studies, and contexts including newcomer classrooms and a new chapter written in Spanish on instruction in students' home languages. This popular resource guides teachers through the coherent design of tasks, lessons, and units that invite all students to engage in productive, meaningful dialogic and intellectually engaging activity. The book concludes with a discussion of where teachers might begin and how teacher
