Environmental Disasters Natural Recovery And Human Responses:

Environmental Disasters, Natural Recovery and Human Responses Roger del Moral, Lawrence R. Walker, 2007-03-29
Natural disasters destroy more property and kill more people with each passing year Volcanic eruptions earthquakes hurricanes tsunamis floods landslides fires and other natural events are becoming more frequent and their consequences more devastating Del Moral and Walker provide a comprehensive summary of the diverse ways in which natural disasters disrupt humanity and how humans cope Burgeoning human numbers shrinking resources and intensification of the consequences of natural disasters have produced a crisis of unparalleled proportions Through this detailed study the authors provide a template for improving restoration to show how relatively simple approaches can enhance both human well being and that of the other species on the planet This book will appeal to ecologists land managers as well as anyone curious about the natural world and natural disasters

Historical Disasters in Context Andrea JANKU, Gerrit Schenk, Franz Mauelshagen, 2011-12-21 Growing concerns about climate change and the increasing occurrence of ever more devastating natural disasters in some parts of the world and their consequences for human life not only in the immediately affected regions but for all of us have increased our desire to learn more about disaster experiences in the past How did disaster experiences impact on the development of modern sciences in the early modern era Why did religion continue to play such an important role in the encounter with disasters despite the strong trend towards secularization in the modern world What was the political role of disasters Historical Disasters in Context illustrates how past societies coped with a threatening environment how societies changed in response to disaster experiences and how disaster experiences were processed and communicated both locally and globally Particular emphasis is put on the realms of science religion and politics International case studies demonstrate that while there are huge differences across cultures in the way people and societies responded to disasters there are also many commonalities and interactions between different cultures that have the potential to alter the ways people prepare for and react to disasters in future To explain these relationships and highlight

their significance is the purpose of this volume

Theoretical Perspectives in Environment-Behavior Research

Seymour Wapner, 2000 Following upon the Handbook of Japan United States Environment Behavior Research published by Plenum in 1997 leading experts review the interrelationships among theory problem and method in environment behavior research The chapters focus on the philosophical and theoretical assumptions underlying current research and practice in the area and link those assumptions to specific substantive questions and methodologies *Encyclopedia of Environmental Change* John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences *Environmental Sciences* K J Gregory, Ian Simmons, Anthony Brazel, John W Day, Edward A Keller, Alejandro Yanez-Arancibia, Arthur G Sylvester, 2008-11-18 Unique in the reference literature this Companion provides students with an introduction to all the major concepts and contemporary issues in the environmental sciences The text is divided into six sections Environmental Sciences Environments Paradigms and Concepts Processes and Dynamic Scales and Techniques Environmental Issues with over 200 entries alphabetically organized and authored by key names in the environmental science disciplines Entries are concise informative richly visual and fully referenced and cross referenced They introduce key concepts and processes that are included in the index cite relevant websites and reflect the latest thinking The Nature of Disaster in China Chris Courtney, 2018-02-15 Unearths the forgotten history of a catastrophic flood examining its profound impact upon the environment and society of modern China Environmental Disaster and the Archaeology of Human Response Garth Bawden, Richard Martin Reyecraft, 2000 This cross cultural study of the response by

human groups to major environmental disruption brings together archaeological experts on Mediterranean Europe Asia Eurasia Peru Mexico and the U S desert Southwest Using the school of geographical analysis known as Hazard Research to identify the key attributes of natural disasters and the human social systems that respond to them researchers consider environmental variables such as the magnitude speed and extent of the disaster as well as social variables such as population density wealth distribution and political complexity to analyze and assess the damage potential of various types of natural disasters Such analyses can be useful in generating hypotheses about human response to disaster and in evaluating catastrophic models of sociopolitical collapse The research in this book tends to show that social collapse is an unusual outcome of environmental disaster The authors hope to identify general patterns of human response to such disasters and the chapters cover major themes such as timing and human agency

Disaster Response Debra A. Miller, 2009 Collection of essays discussing issues surrounding governmental response to manmade or natural disasters

The Journal of Environment & Development, 2008 *New Models for Ecosystem Dynamics and Restoration* Richard J. Hobbs, Katharine N. Suding, Society for Ecological Restoration International, 2009-01-07 Conceptual models based on alternative stable states and restoration thresholds can help inform restoration efforts This title explores how conceptual models of ecosystem dynamics can be applied to the recovery of degraded systems It discusses the basic concepts and models and explores implications of scientific research on restoration practice

Response to Disaster Henry W. Fischer, 2008-08-21 Response to Disaster combines the original research of author Henry W Fischer with the literature used today to describe behavioral and organizational challenges commonly experienced before during and after disasters Actual problems are presented and compared to those often misperceived to occur know as disaster mythology Fisher examines case studies conducted during the post impact and long term recovery periods of major and minor disasters

worldwide He asserts that the role of the mass media assists in eliciting needed help with an effective response but also perpetuates disaster mythology Fisher presents striking comparisons between the perception of disaster in the eyes of the general public the actual situations emergency responders face and the way mass media reporters broadcast information Additionally the problems encountered by emergency response organizations are compared and contrasted with general public and media perceptions of disaster response Fisher presents the response to September 11 2001 the south Asian tsunami and hurricane Katrina in this comprehensive third edition
