Bickford, 2013-09-24 This volume addresses the impact of the geological sciences from 1963-2013 in such areas as geologic hazards mineral resources energy resources water resources soil resources geology and health geologic education and the informing of general public policy The chapters focus on how earth science informs and benefits society Provided by publisher      *Fundamental Processes in Ecology* David M Wilkinson, 2007-09-13 *Fundamental Processes in Ecology* presents a way to study ecosystems that is not yet available in ecology textbooks but is resonant with current thinking in the emerging fields of geobiology and Earth System Science It provides an alternative process based classification of ecology and proposes a truly planetary view of ecological science To achieve this it asks and endeavours to answer the question what are the fundamental ecological processes which would be found on any planet with Earth like carbon based life The author demonstrates how the idea of fundamental ecological processes can be developed at the systems level specifically their involvement in control and feedback mechanisms This approach allows us to reconsider basic ecological ideas such as energy flow guilds trade offs carbon cycling and photosynthesis and to put these in a global context In doing so the book puts a much stronger emphasis on microorganisms than has traditionally been the case The integration of Earth System Science with ecology is vitally important if ecological science is to successfully contribute to the massive problems and future challenges associated with global change Although the approach is heavily influenced by Lovelock's Gaia hypothesis this is not a popular science book about Gaian theory Instead it is written as an accessible text for graduate student seminar courses and researchers in the fields of ecology earth system science evolutionary biology palaeontology history of life astrobiology geology and physical geography      *The Leading Edge*, 1999      Instructor's Resource Manual for Environmental Geology Merritts, 1997-11-21      Environmental Geology of Urban Areas Geological Association of Canada, 1997      **Investigations in Environmental Geology** Duncan Foley, Garry D.
