Enlightenment Very Short Introduction Introductions:

The Enlightenment John Robertson, 2015 This Very Short Introduction explores the history of the 18th century Enlightenment movement Considering its intellectual commitments Robertson then turns to their impact on society and the ways in which Enlightenment thinkers sought to further the goal of human betterment by promoting economic improvement and civil and political justice

Approaching the World's Religions, Volume 1 Robert Boyd, 2017-05-04 Philosophically Thinking about World Religions is different from other works in the discipline today It deviates from the typical approaches used for the study of world religions Its goal is to engage readers in thinking hard about world religions not about the data surrounding those traditions By focusing on philosophical questions each reader should be challenged to do their own investigations that may reveal the heart of these traditions Another stance that this project takes that distinguishes it from other texts in the discipline is that it advocates an inclusivist perspective regarding the world religions Pluralism which is the predominate assumption today ends either in contradiction or in the development of a metatheory that dismisses crucial distinctions between the various traditions or eliminates some ancient religions because they do not fit the metatheory By taking an open inclusivist approach all religious traditions may engage at the table of dialogue The final essay is about justice and social affairs While that discussion is couched within the context of a particular tradition each religious tradition must have the discussion But it must be more than an intrareligious dialogue it must become an interreligious dialogue

Love as a Guide to Morals Andrew Fitz-Gibbon, 2012-01-01 Love as a Guide to Morals is an entry level introduction to the ethical importance of love Written in conversational format this book looks uniquely at the complexity of love in human relationships and how love can guide ethical decision making The book suggests that love in all its intricacy erotic erosic love friendship affection and agapic love is the great good of human life The book argues that love has a unifying power for morality and is more suited to ethical thinking and practice than any other idea Love as a Guide to Morals uses a modified Aristotelian argument after Alisdair MacIntyre and suggests loving relationships rather than happiness as the goal of human life

There are many stories we can tell about the past and we are not perhaps as free as we might imagine in our choice of which stories to tell or where those stories end John Arnold's Very Short Introduction is a stimulating essay about how we study and understand history The book begins by inviting us to think about various questions provoked by our investigation of history and explores the ways these questions have been answered in the past Concepts such as causation interpretation and periodization are introduced by means of concrete examples of how historians work giving the reader a sense of the excitement of discovering not only the past but also ourselves ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable **Rousseau** Robert Wokler, 2001-08-23 One of the most profound thinkers of modern history Jean Jacques Rousseau 1712-78 was a central figure of the European Enlightenment He was also its most formidable critic condemning the political economic theological and sexual trappings of civilization along lines that would excite the enthusiasm of romantic individualists and radical revolutionaries alike In this study of Rousseau's life and works Robert Wokler shows how his philosophy of history his theories of music and politics his fiction educational and religious writings and even his botany were all inspired by visionary ideals of mankind's self realization in a condition of unfettered freedom He explains how in regressing to classical republicanism ancient mythology direct communion with God and solitude Rousseau anticipated some post modernist rejections of the Enlightenment as well ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable **Architecture or Revolution** Nadir Lahiji, 2020-09-22 By linking building theory to the emancipatory project of critique advanced by radical thinkers in our time this work investigates the key conceptual and historical elements that culminate in an emancipatory theory of building entitled Toward a philosophy of shelter Taking Marx as its only resource this work proceeds with the conviction that our era is contemporaneous to Marx's historical era This means not judging the validity of Marx from the perspective of the historical situation but rather demonstrating the validity of a Marxian perspective for a singular historical situation as ours This work will therefore translate this perspective into seeing the situation of architecture through the eyes

of Marx All those concerned with the predicament in our current condition in which architecture must play a major social role in upholding the universal value of what Alain Badiou calls generic humanity will take an interest in this work In particular architects critics scholars and students inside the field of architecture who would be seeking the application of this universal value to a new theory of building will be a welcoming audience for this work **Forthcoming Books** Rose Army,2003-04 The Eighteenth Century Kevin L. Cope,Robert C. Leitz,2007-09 **Perspectives** ,2006
