

## SOLIDWORKS ENTERPRISE PDM

*TAKE CONTROL OF YOUR DATA TO ENHANCE COLLABORATION AND INNOVATION*

### ACCELERATE DESIGN

SolidWorks® Enterprise PDM manages and synchronizes design data across your product development team with a single, easily deployable solution tightly integrated with SolidWorks applications. You extend the reach of your 3DEXPERIENCE environment—locally or remotely, from engineering through manufacturing—to share information, collaborate on designs, and automatically protect design data with integrated tracking and version control.

#### SolidWorks EPDM takes care of your data

SolidWorks Enterprise Product Data Management (EPDM) centralizes the storage of all your engineering data and related files to give you these benefits:

- Secure, indexed repository for fast information retrieval
- Version control for both minor changes and major revisions to prevent data loss
- Integrated workflows that automate your design and approval process for more efficient review and release of final designs

With SolidWorks EPDM, you can dramatically reduce the time you spend searching for parts, assemblies, and drawings. Part of the SolidWorks product development solution covering design, simulation, sustainable design, technical communication, and data management, SolidWorks EPDM will help you drive design reuse and manage your overall 3DEXPERIENCE product development environment.

Implemented in a fraction of the time required by other data management solutions, SolidWorks EPDM can scale from small workgroups to hundreds of designers located in offices anywhere in the world.
