research highlights the personal characteristics and expertise important to business success this book demonstrates that networking is the core of entrepreneurship Both counterintuitive and powerful this perspective reframes entrepreneurial action by placing networking at the center of the process Traditionally networks have been regarded as facilitators of business but Tom Elfring Kim Klyver and Elco van Burg argue that networking is actually the basis of entrepreneurial action and conversely that entrepreneurial action is networking In developing an entrepreneurship as networking model the book addresses the persistent problems that plague the dominant individual opportunity approach in entrepreneurship They describe the key dynamics mechanisms and practices of entrepreneurship as networking and point at fruitful networking strategies for entrepreneurs Thus the authors provide an integrated and dynamic account of entrepreneurial agency that prioritizes interaction with the surrounding social environment They also explain what a viable network is for entrepreneurs and how networking activities affect their endeavours Their perspective sheds new light on the origins of opportunities and how entrepreneurs access and mobilize resources The approach also explains how entrepreneurs build legitimacy and exploit the networks they work within Offering a groundbreaking theory of entrepreneurial action as networking Entrepreneurship as Networking opens up an entirely new research agenda *Creating Entrepreneurial Space* David Higgins, Paul Jones, Pauric McGowan, 2019-06-17 The book draws upon new theoretical perspectives and approaches as a means of illustrating the inherently social and contextualized nature of entrepreneurial practice and advance the manner in which we critically think about and engage with various aspects of entrepreneurial practice and development Interdisciplinary Dialogues on Organizational Paradox Rebecca Bednarek, Miguel Pina e Cunha, Jonathan Schad, Wendy K.
