Environmental Ethics From Theory To Practice:

Environmental Ethics Marion Hourdequin, 2024-01-25 What is environmental virtue Is developing good habits enough What does climate justice require Is ecological restoration just another form of the human domination of nature Exploring these questions and more this book provides an up to date and balanced introduction to environmental ethics It first examines ethical theory then ties theory to practice showing how values guide environmental policies but also how policies and institutions shape environmental values Updated and expanded to engage with the latest scholarship scientific findings and societal challenges this 2nd edition features New sections on food ethics multispecies justice intergenerational ethics and the Anthropocene Contemporary case studies focusing on the rights of nature the use of biotechnology in ecological restoration and just climate transitions Expanded coverage of diverse philosophical traditions including Confucian Daoist and Indigenous ethical perspectives Updated discussion questions further reading sections and online resources Exploring the possibilities and limitations inherent in both classical ethical models and modern theoretical approaches to the environment this is a key resource for teaching students to think ethically about the world we live in *Environmental Ethics* Ronald L. Sandler, 2017 An accessible yet rigorous introduction to the field *Environmental Ethics Theory in Practice* helps students develop the analytical skills to effectively identify and evaluate the social and ethical dimensions of environmental issues Covering a wide variety of theories and critical perspectives author Ronald Sandler considers their strengths and weaknesses emphasizes their practical importance and grounds the discussions in a multitude of both classic and contemporary cases and examples **Connection on the Ice** Patti H. Clayton, 1998 On Friday October 7 1988 Roy Ahmaogak of Barrow Alaska discovered three young gray whales trapped in ice off the Arctic coast The three week rescue operation that followed cost more than a million dollars and grew to include the White House the Soviet Union the environmental community Eskimo whalers Alaskan oil companies school children and journalists from around the world the Alaska National Guard and a host of other corporate governmental scientific and individual participants Some called it a non event a fiasco an absurd waste of money while others considered it the most extraordinary animal rescue effort ever undertaken In any case it is a story not likely to be forgotten Both complex and moving this story grounds Patti Clayton s overview of environmental ethics theory Using the story as a touchstone for critical comparison Clayton explores three major traditions of environmental philosophy extensionism ecofeminism s care ethic and Heideggerian Phenomenology In doing so she guides readers through the evolution and central concepts of each tradition moving intriguingly between theory and the well known rescue story as an apt illustration of the complexities of ethical deliberation Clayton s critical thinking leads to a deeper appreciation of the ways in which different sets of assumptions yield unique interpretations of such issues Readers have the opportunity to consider the implications of this environmental ethics issue as a microcosm of human nonhuman interaction The unifying narrative of the whale story which is based on the commentary of participants and observers provides both an engaging

vehicle for the study of environmental ethics and a real world testament to the multifaceted nature of human nonhuman relationships encouraging readers to reflect on the connection of such incidents in their own lives Author note Patti H Clayton is Visiting Lecturer in the Division of Multidisciplinary Studies at North Carolina State University

Ethics and Environmental Policy Frederick Ferré, Peter Hartel, 1994 In this collection of essays leading environmentalists and philosophers explore the relationship between environmental ethics and policy both in theory and practice The first section of the book focuses on four approaches to change in ethical theory ecological science feminist metaphysics Chinese philosophy and holistic postmodern technology In subsequent sections the contributors emphasize the need for nontraditional solutions and attempt to expand awareness of the most pressing practical problems Among the topics discussed are the possibilities of real international cooperation the inequitable but economically intractable issue of global gasses the political and ethical challenges of city planning and the growing evidence of fundamental inappropriateness in treating land as legal private property This volume is based on essays presented in 1992 at the Second International Conference on Ethics and Environmental Policy The conference was held in response to the increasing need for a new ethics that would counter the traditional human centered dominantly individualistic approach of the industrial world toward the environment

Environmental Philosophy Sahotra Sarkar, 2012-02-07 The first comprehensive treatment of environmental philosophy going beyond ethics to address the philosophical concepts that underlie environmental thinking and policy making today Encompasses all of environmental philosophy including conservation biology restoration ecology sustainability environmental justice and more Offers the first treatment of decision theory in an environmental philosophy text Explores the conceptions of nature and ethical presuppositions that underlie contemporary environmental debates and moving from theory to practice shows how decision theory translates to public policy Addresses both hot button issues including population and immigration reform and such ongoing issues as historical legacies and nations responsibility and obligation for environmental problems Anchors philosophical concepts to their practical applications establishing the priority of the discipline's real world importance

Environmental Ethics, 2008 **The Environment Between Theory and Practice** Avner

de-Shalit,2000-03-10 Why is there a gap between the questions that environmental philosophers discuss and the issues that motivate environmental activists The author attempts to bridge this gap by combining tools of political philosophy with questions of environmental ethics and politics He defends a radical position in relations to environmental protection and social policies in order to put forward a political theory which is not only philosophically sound but also relevant to the practice of environmental activism He argues that several directions in environmental ethics can be at odds with the contemporary political debates surrounding environmental politics He then goes on to examine the environmental scope of the political theories of liberalism communitarianism participatory democracy and socialism and concludes that the last two are crucial for protecting the environment
