Compendium of Environmental Laws of African Countries: Framework laws and EIA regulations (1997 supplement to vol. 1, 1996 ed.) ,1997 **The Dry Forests and Woodlands of Africa** Emmanuel N. Chidumayo,Davison J. Gumbo,2010-09-23 The dry forests and woodlands of Sub Saharan Africa are major ecosystems with a broad range of strong economic and cultural incentives for keeping them intact However few people are aware of their importance compared to tropical rainforests despite them being home to more than half of the continent s population This unique book brings together scientific knowledge on this topic from East West and Southern Africa and describes the relationships between forests woodlands people and their livelihoods Dry forest is defined as vegetation dominated by woody plants primarily trees the canopy of which covers more than 10 per cent of the ground surface occurring in climates with a dry season of three months or more This broad definition wider than those used by many authors incorporates vegetation types commonly termed woodland shrubland thicket savanna wooded grassland as well as dry forest in its strict sense The book provides a comparative analysis of management experiences from the different geographic regions emphasizing the need to balance the utilization of dry forests and woodland products between current and future human needs Further the book explores the techniques and strategies that can be deployed to improve the management of African dry forests and woodlands for the benefit of all but more importantly the communities that live off these vegetation formations Thus the book lays a foundation for improving the management of dry forests and woodlands for the wide range of products and services they provide **Human Rights and the Rule of Law in Namibia** Nico Horn,Anton Bösl,2008 The book provides a compilation of papers on current condition of the management of the rule of law in Namibia **Environmental Law** Michael Kidd,1997 A comprehensive examination of the aspects of South African environmental law The text examines the growing public concern regarding environmental problems and the legal issues surrounding it Designed primarily for students the text should also prove of value to practitioners International Environmental Law and Policy in Africa B. Chaytor,K.R. Gray,2013-11-11 C O OKID1 I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa edited by Kevin R Gray and Beatrice Chaytor It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa a goal

towards which I have had an undivided focus over the last two decades There is still some belief in and outside Africa that for developing countries in general and Africa in particular development and implementation of environmental law is not a priority This belief prevails strongly in many quarters of the industrialised countries In fact the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston s 1979 thesis that Pollution Prevention Pays 2 That group for obvious reasons must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation can find homes to which they can escape and dump their polluting industries *Industries and Enforcement of Environmental Law in Africa* ,1997
