The Workgroup Human Computer Interaction Usability Engineering HCI UE of the Austrian Computer Society OCG serves as a platform for interdisciplinary change research and development While human computer interaction HCI traditionally brings together psychologists and computer scientists usability engineering UE is a software engineering discipline and ensures the appropriate implementation of applications Our 2008 topic was Human Computer Interaction for Education and Work HCI4EDU culminating in the 4th annual Usability Symposium USAB 2008 held during November 20-21 2008 in Graz Austria <http://usab-symposium.tugraz.at> As with the field of Human Computer Interaction in Medicine and Health Care HCI4MED which was our annual topic in 2007 technological performance also increases exponentially in the area of education and work Learners teachers and knowledge workers are ubiquitously confronted with new technologies which are available at constantly lower costs However it is obvious that within our e Society the knowledge acquired at schools and universities while being an absolutely necessary basis for learning may prove insufficient to last a whole life time Working and learning can be viewed as parallel processes with the result that lifelong learning LLL must be considered as more than just a catch phrase within our society it is an undisputed necessity Today we are facing a tremendous increase in educational technologies of all kinds and although the influence of these new technologies is enormous we must never forget that learning is both a basic cognitive and a social process and cannot be replaced by technology
