In the Classroom

Proven Innovation

## What is Digital Literacy?

Digital literacy is a hugely broad term which encompasses many different skills. In a classroom context, we take it to mean the ability to find and consume digital content, be able to create this and also communicate it with others.

Here are six top skills of digitally literate students.

### Skill 1: Basic Technology

Able to use a variety of technology as learning tools – can easily swap between devices and operating systems.

### Skill 2: Knowledge Sharing

Able to demonstrate presentation skills using multimedia tools.

### Skill 3: Cloud Computing

Able to store and access work and learning resources from any location.

### Skill 4: Evaluate Digital Info

Able to assess and identify credible and reliable online sources.

### Skill 5: Digital Citizenship

Able to behave and act appropriately when online. Recognition of the different contexts of online activity.

### Skill 6: Virtual Collaboration

Able to collaborate as effectively online as in person, by sharing documents and insights via online means.

Digital Literacies for Learning Allan Martin,Dan Madigan,2006 In the 21st century digital tools enable information to be generated faster and in greater profusion than ever before to the point where its extent and value are literally beyond imagining Such quantities can only be meaningfully addressed using more digital tools and thus our relationship to information is fundamentally changed This situation presents a particular challenge to processes of learning and teaching

and demands a response from both information professionals and educators Enabling education in a digital environment means not only changing the form in which learning opportunities are offered but also enabling students to survive and prosper in digitally based learning environments This collection brings together a global community of educators educational researchers librarians and IT strategists to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology Traditional notions of literacy need to be challenged and new literacies including information literacy and IT literacy need to be considered as foundation elements for digitally involved learners Leading international experts from the USA Canada Australia New Zealand South Africa Mexico and throughout Europe contribute to the debate and Hannelore Rader Librarian and Dean of the University Libraries University of Louisville Kentucky provides the foreword The book is in two parts In Part 1 Literacies in the Digital Age the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed and discuss the nature of the new literacies that have emerged in this new virtual and e learning environment In Part 2 Enabling and Supporting Digital Literacies the contributors go on to consider the ways in which digital literacies can be made available to learners and how these literacies are being relocated in a more student centred environment within the broader perspective of learning Readership This book takes the issues raised in the successful Information and IT Literacy also co edited by Allan Martin into a broader context It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age

A Collaborative Self-Study in Digital Literacy in Teacher Education  
Patrice R. LeBlanc, Jason Karp, 2016 This paper described the journey the authors took as teacher educators to improve their practice in digital literacy The focus of the journey was to document the how to of the development and integration of digital literacy into courses and the method was collaborative self study The sources of data were ongoing technology training i e training wiki and recordings integration of digital literacy into courses i e applications of readings and training and collaborations and co reflections on the entire process i e phone conversations video conferencing and email Craig s 2009 five exemplars addressed trustworthiness Literature synthesis and training experiences described how the authors developed their knowledge and skills while a detailed example of digital literacy integration and their co reflections explicated both successes and new directions for innovation in practice Specifically the literature review informed the decision making processes for digital literacy integration Co reflection enabled the authors to identify a convergence of concepts from the literature social practices and interactive pedagogy aligned with the learning needs of today s students Digital literacy training addressed the needed functional skills each author had identified for himself or herself as well as reaffirming the need for ongoing professional development The authors reaffirmed the notion that mutual rapport trust and accountability created a learning zone where they were able to construct a deeper understanding of their practice than individual self reflection would have done Finally by describing one area of digital literacy integration the authors contributed to the

literature on the process of digital literacy integration in teacher education Through this collaborative self study the authors documented how they a used their knowledge and skills to make decisions about the use of technology b reaffirmed the use of interactive pedagogy for digital literacy integration and c confirmed the importance of collaboration and co reflection for reframing practice The authors identified the following areas for continued growth The authors need to a be more aware of how teaching philosophy can constrain practice b share with students their instructional choices they made to promote students growth and c seek structured feedback from students in order to better understand the outcomes of digital literacy integration Contains one table      Digital Literacy Susan Wiesinger,Ralph Beliveau,2023 The second edition of Digital Literacy provides a highly focused exploration of key critical concepts in understanding digital media in a clear engaging and accessible way for an introductory audience Core to the books approach is its comparison of digital literacy perspectives across different cultures highlighting the significant disparity in digital privacy and regulation of technology companies across countries to expand on the discourse surrounding modern digital engagement Prescient issues are examined in depth such as decline of traditional media rise of Big Tech and erosion of privacy and democratic ideals Important themes explored in chapters across the book include digital Identity the internet as infrastructure the web as a collaborative tool and domestic and global digital divides The new edition also explores digital literacy and the pandemic as well as the growing body of research around the effects and impact of the digital technologies we use every day There are also useful Applied Skills Appendices outlining core areas of digital practice The text is an ideal resource for students and scholars of mass communication media literacy digital information literacy and digital technology courses as well as for all those wanting to know more about the deep on going impact of communication technologies on our lives      Improving Digital Literacy Through a 1:1 Digital Device Implementation Sherry Watts,2023 The purpose of this applied study was to solve the problem of the need to improve digital literacy for students on an urban middle school campus in South Texas and to design a solution to address this problem I collected data using both qualitative and quantitative approaches Teachers and instructional coaches were interviewed via the Zoom video conferencing online platform to explore how teachers and instructional coaches described the relationship between the deployment of a 1 1 digital device program and the improvement of students digital literacy on their middle school campus I collected quantitative and qualitative survey data from teachers on the South Texas middle school campus being researched to inform the problem of improving students digital through a 1 1 digital device deployment on their middle school campus All surveys were designed using the Google Forms online platform and then distributed electronically I then combined all data retrieved from participants to devise research based guidance and developed a solution to address this problem Based on the findings this applied study identified several recommendations for solving the problem of improving the digital literacy skills for students These recommendations included providing a better 1 1 digital device stronger Wi Fi connections and robust digital training for students and teachers      *Bimonthly Review of Law*

Small,2005 Presents an introduction to designing digital literacy programs through an educational model called IM PACT and includes information on the theory and methods required for creating engaging lesson plans and instructional programs      Digital Diversity: a Study of Teachers' Everyday Digital Literacy Practices Ekaterina Tour,2013 As digital media have become increasingly integrated in everyday life there have been calls for new literacies to become an integral part of language and literacy education Yet traditional approaches to digital technologies which position technology as an occasional add on to existing pedagogies continue to persist in Australian school settings The role of teachers and their approaches to digital technologies have been acknowledged in efforts to explain the challenges associated with teaching and learning new literacies However little is known about what shapes their encounters with digital technologies beyond institutional constraints The research reported in this thesis aimed to address this gap The study was informed by the body of work known as Literacy Studies which conceptualises literacy as a social practice and emphasises the close and complex relationships between literacy practices technology socio cultural contexts identities beliefs and values The study investigated language and literacy teachers everyday digital literacy practices to help explain why teaching and learning new literacies in school settings continues to represent a challenge It focused on teachers ways of thinking about digital technologies how they are constructed and how they shape their experiences Detailed accounts of teachers digital literacy practices promised to highlight what encourages and what constrains their engagement with new literacies in their

everyday lives Located within the theory and practice of qualitative inquiry the research employed a case study approach focusing on five language and literacy teachers working in Melbourne Australia who volunteered to participate The four female teachers and one male teacher ranged in age from 31 to 53 The data sources included demographic profiles with background information about the participants participant generated digital photographs of their everyday practices with technologies individual interviews and online observations over a period of two to three months in social networking spaces including professional blogs Twitter and Facebook Data analysis involved two intertwined approaches visual data analysis and thematic analysis The study found that the participants digital literacy practices ranged from the traditional resembling conventional literacies performed in a more technologised way to the new which were multimodal participatory collaborative creative and hybrid in character The combination of traditional and new was identified across all the cases with some practices more dominant than others The participants traditional literacy practices supported their everyday lives effectively while the new literacy practices provided them with opportunities for engaging in new experiences and constructing new identities and relationships Notably in the context of their everyday practices three of the five participants engaged in informal professional learning online through Personal Learning Networks PLNs a form of learning that was participant driven active communication based and participatory The participants digital mindsets shaped their digital literacy practices These mindsets comprised beliefs associated with everyday life and understandings of the opportunities offered and supported by technologies that is their affordances Their mindsets were constructed under the influence of local contexts but also of the broader global context in which digital technologies are designed and produced The practices associated with new literacies required creative elaborated and critical assumptions about what was possible in digital environments However thinking about technologies in terms of their affordances was challenging for some of the participants their capacity to conceptualise the possibilities provided by technologies and the critical awareness required to scrutinise the opportunities and risks associated with them varied Importantly all the participants were reluctant to scrutinise their dominant ways of thinking about digital technologies The study contributes to the field of Literacy Studies by offering an explanation of why teaching new literacies continues to be challenging It concludes that teachers digital mindsets shape their encounters with digital technologies in important ways As some teachers may experience difficulties with conceptualising new literacies it is time to re think in service and pre service teachers professional learning and education in regard to digital technologies Teachers need opportunities and support to reflect on their everyday digital literacy practices and digital mindsets and to consider critically the implications for teaching new literacies
