Small,2005 Presents an introduction to designing digital literacy programs through an educational model called IM PACT and includes information on the theory and methods required for creating engaging lesson plans and instructional programs Digital Diversity: a Study of Teachers' Everyday Digital Literacy Practices Ekaterina Tour,2013 As digital media have become increasingly integrated in everyday life there have been calls for new literacies to become an integral part of language and literacy education Yet traditional approaches to digital technologies which position technology as an occasional add on to existing pedagogies continue to persist in Australian school settings The role of teachers and their approaches to digital technologies have been acknowledged in efforts to explain the challenges associated with teaching and learning new literacies However little is known about what shapes their encounters with digital technologies beyond institutional constraints The research reported in this thesis aimed to address this gap The study was informed by the body of work known as Literacy Studies which conceptualises literacy as a social practice and emphasises the close and complex relationships between literacy practices technology socio cultural contexts identities beliefs and values The study investigated language and literacy teachers everyday digital literacy practices to help explain why teaching and learning new literacies in school settings continues to represent a challenge It focused on teachers ways of thinking about digital technologies how they are constructed and how they shape their experiences Detailed accounts of teachers digital literacy practices promised to highlight what encourages and what constrains their engagement with new literacies in their
