Sociometrics Tian Dayton, 2022-08-30 In Sociometrics Tian Dayton masterfully integrates principles of group dynamics and psychodrama therapies with insights into bodily states and feelings gained from contemporary neuroscience Sociometrics infuses therapeutic principles in an intuitive and functional program that shifts the agent of healing from the therapist to the group We learn that through sociometrics the threads of healing are woven as the client experiences a reconnection with the inner self and a connection with others Stephen W Porges PhD Distinguished University Scientist Indiana University Professor of Psychiatry University of North Carolina creator of the Polyvagal Theory Embodied relational processes designed to add experiential therapy into addiction treatment centers IOPs and one to one or group therapy settings Relational trauma can

cause a loss of connection with the self and impact our ability to engage comfortably in intimate connection with others. Feeling misread, neglected, or abused by the people we want most to be loved by is a traumatizing experience that is cumulative. When these relational wounds remain unseen and unresolved, they can become the pain pump fueling self-medicating and dysfunctional behaviors that silently pass down through generations.

Sociometrics are embodied research-based processes that educate clients about trauma, grief, and resilience as they offer in the moment experiential relational trauma repair. Created by Dr. Tian Dayton to fit easily into outpatient programs, clinics, and one-to-one settings, sociometrics help to take the guesswork out of incorporating experiential therapy into treatment. They give therapists a clear process that builds momentum for deep change and personal growth. Harnessing the therapeutic power of the group, they teach skills of emotional literacy and self and co-regulation. The combination of sociometrics and simple role plays allow the body as well as the mind to find a voice. They draw on the theory base of psychodrama and sociometry, the first forms of mind-body experiential therapy created by the father of group therapy, Jacob Levy Moreno.
