Ecological Economics Principles And Applications:

Ecological Economics Herman E. Daly, Joshua C. Farley, 2004 This is an introductory textbook for an emerging paradigm that addresses the failure of conventional economics to reflect the value of clean air water species diversity and generational equity It defines a revolutionary transdiscipline that incorporates insights from the environmental sciences

Ecological Economics, Second Edition Herman E. Daly, Joshua Farley, 2011-01-26 In its first edition this book helped to define the emerging field of ecological economics This new edition surveys the field today It incorporates all of the latest research findings and grounds economic inquiry in a more robust understanding of human needs and behavior Humans and ecological systems it argues are inextricably bound together in complex and long misunderstood ways According to ecological economists conventional economics does not reflect adequately the value of essential factors like clean air and water species diversity and social and generational equity By excluding biophysical and social systems from their analyses many conventional economists have overlooked problems of the increasing scale of human impacts and the inequitable distribution of resources This introductory level textbook is designed specifically to address this significant flaw in economic thought The book describes a relatively new transdiscipline that incorporates insights from the biological physical and social sciences It provides students with a foundation in traditional neoclassical economic thought but places that foundation within an interdisciplinary framework that embraces the linkages among economic growth environmental degradation and social inequity In doing so it presents a revolutionary way of viewing the world The second edition of Ecological Economics provides a clear readable and easy to understand overview of a field of study that continues to grow in importance It remains the only stand alone textbook that offers a complete explanation of theory and practice in the discipline **Ecological Economics**

Ecological Economics Textbook and Workbook Set Joshua Farley, Herman Daly, Jon Erickson, 2005-07-01

Frontiers in Ecological Economic Theory and Application Jon David Erickson, John M. Gowdy, 2007 Research on the cutting edge of economics ecology and ethics is presented in this timely study Building from a theoretical critique of the tradition of cost benefit analysis the contributors lay the foundation for a macroeconomics of environmental sustainability and distributive justice Attention is then turned to three of the most critical areas of social and environmental applied research biodiversity climate change and energy The contributors redefine progress away from growth and toward development To this end the first section of the book tackles the dominant framework used in the US today to evaluate tradeoffs between economic growth and its inherent externalities Succeeding chapters cover a wide variety of studies related to biodiversity health and energy Each section is anchored with overviews by top scholars in these areas including Herman Daly Carl McDaniel Stephen Schneider and Nathan Hagens and followed by detailed analyses reflecting the transdisciplinary approach of ecological economics Students and scholars of ecological environmental and natural resource economics sustainability sciences and environmental studies will find this book of great interest Non profit and government agencies in search of methods and cases that merge the study of ecology and economics will also find the analyses of great practical value

Getting Down to Earth International Society for Ecological Economics, 1996 Ecological economics a transdisciplinary approach focusing on the problems facing humanity and the life supporting ecosystems on which we depend is helping to foster the dialogue necessary to pull the package together and move toward newly articulated goals
