Eco-hydrology Andrew J. Baird, Robert L. Wilby, 1999 Leading ecologists and hydrologists present reviews of the eco hydrology of drylands wetlands temperate and tropical rain forests rivers and lakes to offer an overview of the complex relationships between plants and water *Urban Ecology* Jari Niemelä, Jürgen H. Breuste, Glenn Guntenspergen, Nancy E. McIntyre, Thomas Elmqvist, Philip James, 2011-11-17 Urbanization is a global phenomenon that is increasingly challenging human society It is therefore crucially important to ensure that the relentless expansion of cities and towns proceeds sustainably Urban ecology the interdisciplinary study of ecological patterns and processes in towns and cities is a rapidly developing field that can provide a scientific basis for the informed decision making and planning needed to create both viable and sustainable cities Urban Ecology brings together an international team of leading scientists to discuss our current understanding of all aspects of urban environments from the biology of the organisms that inhabit them to the diversity of ecosystem services and human social issues encountered within urban landscapes The book is divided into five sections with the first describing the physical urban environment Subsequent sections examine ecological patterns and processes within the urban setting followed by the integration of ecology with social issues The book concludes with a discussion of the applications of urban ecology to land use planning The emphasis throughout is on what we actually know as well as what we should know about the complexities of social ecological systems in urban areas in order to develop urban ecology as a rigorous scientific discipline **Model of the Long-term Transfer of Radionuclides in Forests** Rodolfo Avila, 2006

Journal of Meteorology , 2003 **Urban Ecology** Kevin J. Gaston, 2010 This is the urban century in which for the first time the majority of people live in towns and cities Understanding how people influence and are influenced by the green component of these environments is therefore of enormous significance Providing an overview of the essentials of urban ecology the book begins by covering the vital background concepts of the urbanisation process and the effect that it can have on ecosystem functions and services Later sections are devoted to examining how species respond to urbanisation the many facets of human ecology interactions and the issues surrounding urban planning and the provision of urban green spaces Drawing on examples from urban settlements around the world it highlights the progress to date in this burgeoning field as well as the challenges that lie ahead Provided by publisher [Current Geographical Publications](#) University of Wisconsin--Milwaukee. Library, 2000 Current Geographical Publications CGP is a non profit service to the scholarly community initiated in 1938 by the American Geographical Society of New York Beginning in 2006 the format changed to include the tables of contents of current geographical journals The journal titles listed link to web pages or PDF scans of the

current issue s contents **The Environment** Chris C. Park,2001 The second edition of this fully integrated introductory text for courses in environmental studies and physical geography builds on the resounding success of the first edition providing a comprehensive account of modern environmental issues and the physical and socio economic framework in which they are set It explains the principles and applications of the different parts of the Earth s system the lithosphere atmosphere hydrosphere and the biosphere and explains the interrelationships within and between these systems It explores the present environmental crisis examines how the planet Earth fits into the wider universe and explores human environment interactions **Bibliographic Guide to the Environment** ,1992 American Book Publishing Record ,2001

Meteorological and Geoastrophysical Abstracts ,1997 *Progress in Modern Hydrology* John C. Rodda,Mark Robinson,2015-08-26 Hydrology is vital to human civilisations as well as to natural ecosystems yet it has only emerged as a distinct scientific discipline during the last 50 years or so This book reviews the development of modern hydrology primarily through the experiences of the multidisciplinary team of scientists and engineers at Wallingford near Oxford who have been at the forefront of many of the developments in UK hydrological research These topics include The development of basic understanding through the collection of data with specialised instrumentation in experimental basins The study of extreme flows both floods and droughts The role moisture in the soil Studies of the processes controlling evaporation Water resource studies Modelling and prediction of the extremes of flow improved Understanding of water quality issues A widening recognition of the importance of an ecosystem approach Meeting the challenges of climate change Data handling Future developments in hydrology and the pressures which generate them Readership hydrologists in both academia and a wide range of applied fields such as civil engineering meteorology geography and physics as well as advanced students in earth science environmental science and physical geography programmes worldwide *The British National Bibliography* Arthur James Wells,2001 Physical Geography K J Gregory,2005-10-10 This four volume set begins by examining the knowledge of physical geography from the quantitative revolution to current state of mathematical models The principal environment spheres for example the biosphere are examined to show the greater concern with environmental dynamics now central to the discipline This work includes studies of environmental change looking at short term as well as longer term change and evaluating aspects of global change Volume IV focuses on the total physical environment examining human activity and human impact environmental hazards and applied physical geography **International Journal of Ecohydrology & Hydrobiology** ,2006 *Ecohydrology of High Mountain Areas* Suresh R. Chalise,1998 **Standard Handbook of Environmental Science, Health, and Technology** Jay H. Lehr,Janet K.
