## **Factors Influencing Individual Taxpayer Compliance Behaviour Hardcover 2013 By Ken Devos:**

**Factors Influencing Individual Taxpayer Compliance Behaviour** Ken Devos, 2013-09-30 This volume provides a comprehensive analysis of why taxpayers behave the way they do. It reveals the motivations for why some taxpayers comply with the law while others choose not to comply. Given the current global financial climate, there is a need for governments worldwide to increase their revenue collections via improving taxpayer compliance. Research into what shapes and influences taxpayer behavior is critical in that any marginal improvement in understanding and dealing with this behavior can potentially have a dramatic impact upon government revenue. Based on Australian data derived from the data bases of the Australian Taxation Office as an example, this book presents findings that provide lessons for tax systems around the world. Regardless of the type of tax system in place, taxpayers of all nationalities are concerned about how their tax authorities deal with non-compliance and in particular how the tax authorities go about encouraging compliance and ensuring a fair tax system for all. The book presents empirical evidence concerning taxpayer compliance behavior with particular attention being drawn to the moral values of taxpayers, the perceived fairness of the tax system, and the deterrent measures undertaken by revenue authorities which influence that behavior. Other issues examined include the degree to which tax penalties operate as an effective deterrent to curbing behavior and how taxpayers' level of general tax knowledge and awareness also impacts upon their actions.

It plays a pivotal role in ensuring fiscal stability, social justice, and economic stability. However, governments around the world face an increasing prevalence of tax evasion, more sophisticated tax optimization practices, the complexity of tax regimes, and a growing distrust of institutions by citizens. These challenges test the capacity of governments to ensure a stable and fair tax base. *Modeling and Profiling Taxpayer Behavior and Compliance* explores the major challenges of tax compliance through the lens of taxpayer behavior shaped by a multitude of economic, psychological, sociological, cultural, institutional, legal, political, and technological factors. It examines the factors that influence the way individuals and companies comply with their tax obligations. Covering topics such as tax morality, communication strategies, and creative accounting, this book is an excellent resource for tax inspectors, lawyers, and advisors, auditors, accountants,

policymakers legislators business leaders entrepreneurs researchers academicians and more      *Personality Aspects of Tax Compliance Behaviour* Livia Lukovszki, Norbert Sipos, András Rideg, Zsófia Vörös, 2023 Thanks to the famous slippery slope theory a wide range of factors influencing tax compliance behaviour have been studied in numerous papers Still the knowledge on the relationship between these factors and personality traits is limited Studies mainly concentrated on the Big Five traits and assessed tax compliance behaviour as a phenomenon The present study by applying CFA and OLS linear regression on the survey data of 350 respondents explores the relationships between the Big Five personality traits HEXACO Honesty Humility Machiavellianism and the influencing elements of tax compliance behaviour to understand who and why is more likely to evade taxes than others We found that HEXACO Honesty Humility Machiavellianism and Agreeableness affect more elements of the tax evasion behaviour than the other examined personality traits We argue that this is because HEXACO Honesty Humility Machiavellianism and Agreeableness are directly linked to the dilemma of prioritising individual or prosocial values and duties Honesty Humility seems to relate to almost all aspects of tax evasion and thus to be the most important determinant of tax compliance behaviour      *Taxpayer Compliance from Three Research Perspectives* Nicholas Hunt, 2016 Tax evasion is a serious issue that influences governmental revenues IRS enforcement strategies and tax policy decisions While audits are the most effective method of enforcing compliance they are expensive to conduct and the IRS is only able to audit a fraction of the returns filed each year This suggests that audits alone are not sufficient to curb the billions of dollars of tax evaded by taxpayers each year and that a better understanding of factors influencing compliance decisions is needed to enable policymakers to craft tax policies that maximize voluntary compliance Prior research tends to model compliance as economic environmental or personal decisions however this study models it as a multifaceted decision where these three perspective individually and interactively influence compliance It is the first to decompose perceived detection risk into two dimensions selection risk and enforcement risk and investigates how these two dimensions of risk decision domains refund or tax due positions and three personal factors mental accounting narcissism and proactivity influence taxpayers compliance decisions I conducted a 2x2 fully crossed experiment involving 331 self employed taxpayers These taxpayers have opportunities to evade that employed taxpayers do not For example they can earn cash income that is not reported to the IRS by third parties For self employed taxpayers especially those wanting to evade perceived selection and enforcement risks may be distinctly different depending on a taxpayer's situation what they believe they can control and what risk they are willing to accept For example selection risk may be perceived as the greatest risk for those with unreported items on their return while enforcement risk may be more prominent for those perceiving certain levels of selection risk Thus I believe self employed taxpayers are the most appropriate population to sample from and are likely have reasonable variation in the three personal factors of interest I find that taxpayers do differentiate between selection and enforcement risks but the difference only manifests for taxpayers in certain decision domains Taxpayers in a refund position i

e conservative mindset had a greater sensitivity to the form of payment cash vs check and appeared to use this information to make inferences about enforcement risk which was significantly different from their perceptions of selection risk Conversely tax due taxpayers i e aggressive mindset appeared to overlook the form of payment and did not assess these two risks as significantly different Evaluating the full sample suggests that both selection risk and enforcement risk have a positive influence on compliance Further these risks interact to influence compliance Specifically compliance is greatest when taxpayers perceive a high likelihood of being selected for an audit and enforcement risk only matters when selection risk is low This finding is interesting and suggests that avoiding interaction with the IRS is a primary objective of taxpayers In line with my findings of taxpayers perceiving different risks in refund and tax due positions the influence of risk perceptions on compliance differed for taxpayers in these positions Refund taxpayers were influenced by both selection and enforcement risk similar to the full model however tax due taxpayers were only influenced by selection risk and appeared to completely overlook enforcement risk when making their reporting decision Lastly the study shows that personal characteristics can also influence compliance in the presence of economic and environmental determinants but some characteristics only manifest in specific decision domains Of the three personal characteristics investigated only mental accounting orientation was a significant predictor for the full sample When the sample was split by decision domain only proactivity was a predictor of compliance for refund taxpayers while only mental accounting orientation was a predictor of compliance for due taxpayers While I did not find results for narcissism and compliance my subsequent analysis suggests that individual dimensions of narcissism may be better predictors of compliance than the full measure Specifically the exploitation dimension was a significant predictor of compliance for those in a tax due position This study make several contributions to the accounting and tax literatures First this study provides support for a two construct conceptualization for perceived detection risk that includes both selection and enforcement risks Second it answers calls to investigate more comprehensive compliance models and finds economic environmental and personal characteristics individually and interactively influence compliance Third this study investigates three personal factors that have not been investigated in the tax compliance literature Finally this study answers calls for research on self employed taxpayers and suggests that the IRS will be more successful in increasing compliance by playing on taxpayers aversion to being selected for an examination than communicating information on the IRS ability to detect noncompliance during an examination

### **The Causes and Consequences of Income Tax**

**Noncompliance** Jeffrey A. Dubin, 2011-12-02 Taxpayer compliance is a voluntary activity and the degree to which the tax system works is affected by taxpayers knowledge that it is their moral and legal responsibility to pay their taxes Taxpayers also recognize that they face a lottery in which not all taxpayer noncompliance will ever be detected In the United States most individuals comply with the tax law yet the tax gap has grown significantly over time for individual taxpayers The US Internal Revenue Service attempts to ensure that the minority of taxpayers who are noncompliant pay their fair share with a

variety of enforcement tools and penalties The Causes and Consequences of Income Tax Noncompliance provides a comprehensive summary of the empirical evidence concerning taxpayer noncompliance and presents innovative research with new results on the role of IRS audit and enforcements activities on compliance with federal and state income tax collection Other issues examined include to what degree taxpayers respond to the threat of civil and criminal enforcement and the important role of the media on taxpayer compliance This book offers researchers students and tax administrators insight into the allocation of taxpayer compliance enforcement and service resources and suggests policies that will prevent further increases in the tax gap The book s aggregate data analysis methods have practical applications not only to taxpayer compliance but also to other forms of economic behavior such as welfare fraud

**Taxpayer Compliance, Volume 1**  
 Jeffrey A. Roth, John T. Scholz, Ann Dryden Witte, 2016-11-11 Not everyone complies with the United States Internal Revenue Code Many individuals and organizations fail to file timely tax returns assess their tax liability correctly or pay taxes when due To improve compliance tax administrators must choose among alternative strategies such as increasing evaders risks of punishment motivating social norms and making compliance easier Concerned with these choices the IRS asked the National Academy to assess previous research on the determinants of taxpayer compliance and to highlight the most promising areas for future research The Academy s panel authored the two volume Taxpayer Compliance Volume I presents the panel s report which critically reviews previous research on the subject reaches conclusions about the findings and recommends future research programs to fill gaps in knowledge The report also recommends ways to maintain and develop the intellectual financial and data resources devoted to taxpayer compliance research Volume I presents the panel s report which critically reviews previous research on the subject reaches conclusions about the findings and recommends future research programs to fill gaps in knowledge The report also recommends ways to maintain and develop the intellectual financial and data resources devoted to taxpayer compliance research Taxpayer Compliance will be a valuable reference for tax practitioners and others concerned with noncompliance problems and for scholars and students of law and sociology political science social psychology and economics
