## **Facet Theory Form And Content Advanced Quantitative Techniques In The Social Sciences:**

*Facet Theory* Ingwer Borg, Samuel Shye, 1995-06-09 Facet Theory FT is presented in this volume as a methodological approach that combines content design and data analysis Following a brief overview of FT design FT data analysis and the correspondence hypotheses between the two the authors consider the role facets play in observations and equivalence relations and discuss in detail mapping sentences and their common range constructing questionnaire items correspondence hypotheses relating to FT design bivariate regression hypotheses and how to analyze data profiles with hypotheses for structuples and similarity structures In conclusion the issues of using FT in practice including measurement theory and significance testing are addressed *Mereologies, Ontologies, and Facets* Paul M. W. Hackett, 2018-07-15 The assignment events objects state of beings etc to an experiential category is a fundamental activity carried out by human and by other animals So rudimentary are the processes involved in categorizing that it is indeed impossible to imagine conscious awareness to exist without the presence of categories A considerable body of writing exists on categories dating from the times of Classical philosophy Plato developed a categorical ontology and Aristotle produced one of the earliest examples of a complex understanding of basic ontologies A number of other categorially structured ontologies have been proposed including those by Lowe Westerhoff Chisholm etc The book is an edited collection of up to the moment essays that address critical aspects on the understanding of categories and categorial systems The perspectives included in the book are drawn from philosophy psychology theology divinity comparative cognition and facet theory The authors are all renowned experts in the area of their writing Topics addressed include both contemporary advances in the understanding of perennial debates and latest thinking upon how categories are employed to structure our experiences of the world we live in The book is distinct as being written by philosophers and psychologists The book is a collection of writings from selected academics at the fore of debates and understandings of categories in contemporary thought The text provides a single source for contemporary scholarship in categories No single text that brings together expositions of categorial experiences for students and academics within the above listed disciplines **Facet Theory and the Mapping Sentence** Paul M.W. Hackett, 2021-03-23 This book is the second edition of *Facet Theory and the Mapping Sentence* *Evolving Philosophy Use and Application* 2014 It consolidates the qualitative and quantitative research positions of facet theory and delves deeper into their qualitative application in psychology social and the behavioural sciences and in the humanities In their traditional quantitative guise facet theory and its mapping sentence incorporate multi dimensional statistics They are also a way of thinking systematically and thoroughly about the world The book is particularly concerned with the development of the declarative mapping sentence as a tool and an approach to qualitative research The evolution of the facet theory approach is presented along with many examples of its use in a wide variety of research domains Since the first edition the major advance in facet theory has been the formalization of the use of the declarative mapping sentence and this is given a

prominent position in the new edition The book will be compelling reading for students at all levels and for academics and research professionals from the humanities social sciences and behavioural sciences

**Conceptual Categories and the Structure of Reality: Theoretical and Empirical Approaches** Paul M.W. Hackett,2019-01-21 In this eBook Conceptual Categories and the Structure of Reality the title very well describes the book s content Within the book s pages a selection of academics from a variety of human behaviour human social science and humanities disciplines write about their research all of which can be typified by their consideration of how categories are used to structure understanding of phenomena These authors have considered how reality may be understood through notions such as categorial and structural ontologies part whole relationships mereology the qualitative quantitative and philosophical use of the facet theory approach to research mapping sentences and declarative mapping sentence hermeneutics concepts and constructs similarities and differences The resulting collection presents the foregoing conceptual and empirical approaches to knowledge development in general

**Projective Techniques and Sort-Based Research Methods** Paul M.W. Hackett,James M. Suvak,Ava Gordley-Smith,2023-04-05 Projective Techniques and Sort Based Research Methods offers a brief introductory guide to the use of these exciting innovative and often artistic approaches to students and researchers who have no prior knowledge of these This book brings together a wide range of examples of projective and mapping techniques that offer the ideal methodology for researchers wishing to collect less controlled and filtered material that tap the deeper levels of the conscious and sub conscious to reveal a more profound richer and hidden level of response It presents the techniques in a way that will enable the reader to appreciate their nature and to choose an appropriate method for their own research Information is also provided that allows readers to design and implement their own projective or sort based approaches Each of the approaches the authors present are concisely described and their usages explained along with references and examples of the applied usage of the technique The book is valuable reading for researchers from a wide range of academic disciplines from within the social sciences humanities business studies marketing etc The book is an introductory guide but it will be appropriate for use with undergraduate post graduate and research students It will also be of great use to professionals working in the areas of consumer behaviour marketing and communications

**Declarative Mapping Sentences in Qualitative Research** Paul M. W. Hackett,2020-10-01 In this book Hackett introduces the traditional usage of

the mapping sentence within quantitative research reviews its philosophical underpinnings and proposes the declarative mapping sentence as an instrument and approach to qualitative scholarship With a helpful glossary and a range of illustrative tables Hackett takes the reader through a straightforward introduction to mapping sentences and their construction before discussing declarative mapping sentences and possible future research directions This innovative direction for social research provides a flexible structure for research domain and it allows qualitative research results to be uniformly sorted Declarative Mapping Sentences in Qualitative Research will be essential reading for researchers academics and postgraduate students in the fields of qualitative psychology and psychological methods as well as philosophical psychology and social science research methods Journal of Scientific & Industrial Research ,1996 Comparative Methods in the Social Sciences Alan Sica,2005 Data Science, Classification, and Related Methods International Federation of Classification Societies. Conference,1998-03 This volume contains selected papers covering a wide range of topics including theoretical and methodological advances relating to data gathering classification and clustering exploratory and multivariate data analysis and knowledge seeking and discovery The result is a broad view of the state of the art making this an essential work not only for data analysts mathematicians and statisticians but also for researchers involved in data processing at all stages from data gathering to decision making Structural Equation Modeling David Kaplan,2000-10-17 By focusing on how structural equation modeling SEM can illuminate what we know about social and behavioral phenomena rather than on the ins and outs of the various SEM programs eg AMOS LISREL EQS David Kaplan demonstrates to the reader the utility of SEM its limitations and the statistical underpinnings of the method The book begins with an explanation of confirmatory factor analysis and path analysis and how these two techniques can be combined for SEM **Multivariate Taxometric Procedures** Niels G. Waller,Paul E. Meehl,1998 Can taxometric procedures be used to distinguish types species latent classes taxa from continua dimensions latent traits factors and if so how Aimed at demystifying this process Waller and Meehl unpack Meehl s work on the MAXCOV HITMAX procedure to reveal the underlying rationale of MAXCOV in simple terms and show how this technique can be profitably used in a variety of disciplines by researchers in their taxonomic work **Log-Linear Models for Event Histories** Jeroen K. Vermunt,1997-05-13 Event history analysis a method for explaining why some people are more likely to experience a particular event transition or change than other people has been useful in the social sciences for studying the processes of social change One of the main difficulties however in using this technique is that often information is partially missing on some of the relevant variables Author Jeroen K Vermunt presents a general approach to these missing data problems in event history analysis that is based on the similarities between log linear hazard and event history models The book begins with a discussion of log linear log rate and modified path models and methods for obtaining maximum likelihood estimates of the parameters of these models Vermunt then shows how to incorporate variables with missing information in log linear models for non response In addition he covers such topics as the main types of hazard

models censoring the use of time varying covariates models for competing risks multivariate hazard models and a general approach for dealing with missing data problems including unobserved heterogeneity measurement error in the dependent variable measurement error in the covariate partially missing information on the dependent variable and partially observed covariate values *Latent Class and Discrete Latent Trait Models* Ton Heinen,1996-04-24 In addition he reviews log linear models latent trait models and a number of restricted latent class models in detail as well as for the estimation of parameters for these models *American Book Publishing Record* ,1995 **AES**; ,2002 **The British National Bibliography** Arthur James Wells,1995 *Whitaker's Books in Print* ,1998 *Combined Proceedings* American Marketing Association,1972 Proceedings of the Spring and Fall conferences *Marketing Education and the Real World and Dynamic Marketing in a Changing World* American Marketing Association,1973 **Advances in Facet Theory Research: Developments in Theory, Application and Related Approaches** Paul M. W. Hackett,Yael Fisher,2019-11-01 In this Research Topic the two editors bring together a series of articles that use facet theory and allied approaches to research Since its inception in the work of Louis Guttman in the mid twentieth century facet theory has become an established approach within social science research In addition over the past 70 years a wide range of research publications have appeared operating within the theoretical and analytic rubric of facet theory and for the last two decades a biennial international conference has been held devoted to facet theory research When using a facet theory approach an implicit aim of the research within this framework is to bring together in an explicit manner a clear definition of the content area that is being investigated along with data analysis procedures Integrating the explicit design of research content for example attitudes values etc and its subsequent analysis for example to identify the variables that are influential to respondents in relation to the specific area under investigation allows for the construction of theory relating to the content area and for the meaningful measurement of complex research areas The clear explication of an area of research content is achieved through the use of a mapping sentence MS In a MS all of the pertinent variables called facets associated with the specific subject matter of the research study are specified in the form of a natural language sentence where facets variables are arrange to demonstrate how these theoretically relate to each other Sub levels of facets are defined in such a way as to capture the relationships of research variables facets to each other and the overall research domain Background variables are also stated in the MS along with a specified range over which observations will be made to test the veracity of the structural hypotheses statements regarding the proposed manner in which variables are related to the study s content implicit in the MS Furthermore by using a MS the researcher is able to select variables that appropriately address the area of content Traditionally facet theory has been used in quantitative research but has recently been applied to the analysis of qualitative and philosophical research which incorporates a declarative mapping sentence in such research and which is included in this Research Topic In order to interrogate these structural hypotheses quantitative data analysis procedures are employed such

as Smallest Space Analysis SSA and Partial Order Scalogram Analysis by base Coordinates POSAC In SSA the structure of the content area of interest the variables that have been included in the MS can be interrogated as observations that have been made along the specified outcome range are represented geometrically as partitioned regions in a concept space related to the specific research domain Individual respondents may also be investigated in terms of their profile of facet related scores using POSAC A similar approach is employed when analysing information from qualitative facet theory research which interrogates the structural hypotheses present in the declarative mapping sentence through approaches such as content and narrative analyses This Research Topic presents work from scholars with particular emphasis upon how the approach has developed both theoretically and in terms of its application new areas of application and advances in theory development
