Geist Meines Vaters Ein Lebensbild:

The Miracle of Analogy Kaja Silverman, 2015-03-04 The Miracle of Analogy is the first of a two volume reconceptualization of photography It argues that photography originates in what is seen rather than in the human eye or the camera lens and that it is the world's primary way of revealing itself to us Neither an index representation nor copy as conventional studies would have it the photographic image is an analogy This principle obtains at every level of its being a photograph analogizes its referent the negative from which it is generated every other print that is struck from that negative and all of its digital offspring Photography is also unstoppably developmental both at the level of the individual image and of medium The photograph moves through time in search of other kin some of which may be visual but others of which may be literary architectural philosophical or literary Finally photography develops with us and in response to us It assumes historically legible forms but when we divest them of their saving power as we always seem to do it goes elsewhere The present volume focuses on the nineteenth century and some of its contemporary progeny It begins with the camera obscura which morphed into chemical photography and lives on in digital form and ends with Walter Benjamin Key figures discussed along the way include Nic phore Ni pce Louis Daguerre William Fox Talbot Jeff Wall and Joan Fontcuberta The National Union Catalog, Pre-1956 Imprints Library of Congress, American Library Association.
