Institutions in Global Distributive Justice András Miklós, 2013 The first systematic treatment of the role of institutions in cosmopolitan theories of distributive justice

Institutions in Global Distributive Justice Andras Miklos, 2013-02-20 Defining an institution as a public system of rules that sets out positions rights and duties Andras Miklos uses a philosophical argument to analyse the roles that social economic and political institutions play in conditioning the justification scope and content of principles of justice He critically evaluates a number of positions about the role of institutions in generating requirements of distributive justice and considers their implications for the scope global or otherwise of justice He then develops a novel theory about the role political and economic institutions play in determining the content of requirements of distributive justice and in a cosmopolitan argument against statist positions shows how they can affect the scope of application of these requirements

The Legitimacy of International Trade Courts and Tribunals Robert Howse, Hélène Ruiz-Fabri, Geir Ulfstein, Michelle Q. Zang, 2018-04-12 The recent rise of international trade courts and tribunals deserves systemic study and in depth analysis This volume gathers contributions from experts specialised in different regional adjudicators of trade disputes and scrutinises their operations in the light of the often debated legitimacy issues It not only looks into prominent adjudicators that have played a significant role for global and regional integration it also encloses the newly established and or less known judicial actors Critical topics covered range from procedures and legal techniques during the adjudication process to the pre and post adjudication matters in relation to forum selection and decision implementation The volume features cross cutting interdisciplinary discussions among academics and practitioners lawyers philosophers and political scientists In addition to fulfilling the research vacuum it aims to address the challenges and opportunities faced in international trade adjudication

Justice in a Changing World Cecile Fabre, 2007-10 Should governments give special rights to ethnic minorities Should rich countries open their borders to economic immigrants When implementing economic environmental policies should current generations take into account

the interests of future generations This book will be a valuable resource for students of political theory **China in Global Governance of Intellectual Property** Wenting Cheng,2023-02-10 This book analyses how China has engaged in global IP governance and the implications of its engagement for global distributive justice It investigates five cases on China's IP engagement in geographical indications the disclosure obligation IP and standardisation and its bilateral and multilateral IP engagement It takes a regulation oriented approach to examine substate and non state actors involved in China's global IP engagement identifies principles that have guided or constrained its engagement and discusses strategies actors have used in managing the principles Its focus on engagement directs attention to processes instead of outcomes which enables a more nuanced understanding of the role that China plays in global IP governance than the dichotomic categorisation of China either as a global IP rule taker or rule maker This book identifies two groups of strategies that China has used in its global IP engagement forum and agenda related strategies and principle related strategies The first group concerns questions of where and how China has advanced its IP agenda including multi forum engagement dissembling and more cohesive responsive engagement The second group consists of strategies to achieve a certain principle or manage contesting principles including modelling and balancing It shows that China's deployment of engagement strategies makes its IP system similar to those of the EU and the US Its balancing strategy has led to constructed inconsistency of its IP positions across forums This book argues that China still has some way to go to influence global IP agenda setting in a way matching its status as the second largest economy Egalitarianism and Global Justice Kevin K. W. Ip,2016-07-28 In this book Kevin Ip articulates and defends an egalitarian conception of global distributive justice grounded on the value of equality as a normative ideal of how human relations should be conducted Arguing that relationships of equality rather than those characterized by domination or exploitation are a requirement for a just system Ip spells out the real world implications of this approach Ip defends the ideal of equality against the diverse objections which have been brought to bear and the responsibilities we bear in our aspirations towards global justice Ethics and World Politics Duncan Bell,2010-03-25 The book opens with a discussion of different methods and approaches employed to study the subject including analytical political theory post structuralism and critical theory It then surveys some of the most prominent perspectives on global ethics including cosmopolitanism communitarianism of various kinds theories of international society realism postcolonialism feminism and green political thought Part III examines a variety of more specific issues including immigration democracy human rights the just war tradition and its critics international law and global poverty and inequality Publisher description

Encyclopedia of Global Justice Deen K. Chatterjee,2011-10-06 This two volume Encyclopedia of Global Justice published by Springer along with Springer's book series Studies in Global Justice is a major publication venture toward a comprehensive coverage of this timely topic The Encyclopedia is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars

from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The Encyclopedia sets the tone and direction of this increasingly important area of scholarship for years to come The entries number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas Global Justice and Resource Curse Frank Aragbonfoh Abumere,2021-08-12 This book explores whether any theory alone is sufficiently capable of resolving the complexity of global justice arguing that a combination of statism and cosmopolitanism is needed In current times xenophobia nationalism and populism have amplified othering in both domestic and international politics In global justice the dichotomy between the polis and the cosmopolis separates statism from cosmopolitanism Using resource curse as a complex case of global justice the author demonstrates how neither statism nor cosmopolitanism alone are sufficient but goes on to argue that a combination of the two theories is simultaneously necessary and sufficient to resolve the complexity of global justice He demonstrates how statism is primarily applied to the institutional dimensions of resource curse and only secondarily applied to the interactional dimensions while cosmopolitanism is applied to the interactional dimensions but only secondarily applied to the institutional dimensions and therefore a combination of both theories is needed to resolve the problem of resource curse using the strength of the former to compensate for the weakness of the latter and vice versa Global justice is widely taught and researched as one of the most important areas in political philosophy and political theory This book will be of great interest to students and researchers philosophers and political scientists of African politics political theory political philosophy international relations and international development *Global Justice, Global Institutions* Daniel M. Weinstock,2007 Defining the principles of justice that ought to govern the global economic and political sphere is one of the most urgent tasks that contemporary political philosophers face But they must also contribute to working through the institutional implications of these principles How might principles of global justice be realised Must the institutions that aim to implement them be transnational or can global justice be attained within the context of the state system Can institutions of democratic self governance be imagined beyond the nation state These are just some of the questions that still face political philosophers even when issues of abstract principle have been addressed This volume establishes a dialogue between philosophers working at all levels of abstraction Some of the authors are concerned with the grounds and scope of the obligations that bind the citizens and governments of rich countries to those of poorer nations But many examine the question of how these obligations can be satisfied both within existing institutional frameworks and beyond Together their essays constitute a major contribution to the advancement of both the theoretical understanding and the practical requirements of global justice Global Distributive Justice Louis Franklin Cooper,1979 **Global Justice and Territory** Cara Nine,2012-05-31 Historical injustice and global inequality are basic problems embedded in territorial rights In *Global Justice and Territory* Cara Nine advances a general theory of territorial rights adapting a theoretical

framework from natural law theory to ground all territorial claims Global Distributive Justice Christoph Hanisch, University of St. Andrews. School of Philosophical and Anthropological Studies, 2007 **Global Norms in the Twenty-first Century** Klaus-Gerd Giesen, Kees van der Pijl, 2006 Norms in the contemporary world system are no longer established exclusively through inter state agreement but increasingly are becoming truly global This is made possible by the rapid privatisation of law and the self regulation of the transnational private sector Other forces driving this epochal transformation are the overwhelming pre eminence of the United States the erosion of the role of the United Nations and the appearance of new actors such as subnational entities and NGO TM s They all contribute to the creation and ideological justification of new norms This collection brings together critical studies on this complex process Written by authors from eleven different countries both established scholars and young specialists the book challenges the often convenient rationalisations of regime theory the governance approach and post national TM or cosmopolitan TM democracy in order to explore the practical theoretical and ethical implications of the new world of global norms Global Distributive Justice as Fairness Alicia Lorraine Bannon, 2001 The New Conservatism and its Critics Joseph Prud'homme, 2025-12-11 The rise of Donald Trump has underscored the importance of understanding the intellectual defenses of a so called New Conservatism This book contains essays defending new forms of conservatism critiques of this movement by scholars sympathetic to conservatism and classical liberalism and criticisms of conservatism both new and old Its 23 chapters are authored by leading thinkers including Patrick Deneen Arthur Milikh Scott Yenor Robert George Wilfred McClay Joshua Mitchell R R Reno Corey Brettschneider Laura Field and Jacob Levy **What is this thing called Global Justice?** Kok-Chor Tan, 2021-09-01 What is this thing called Global Justice is a clear and engaging introduction to this widely studied and important topic It explores the fundamental concepts issues and arguments at the heart of global justice including world poverty economic inequality nationalism human rights humanitarian intervention immigration global democracy and governance climate change reparations health justice international justice This second edition has been updated throughout and includes two new chapters on ethical and moral debates concerning reparations and on global health justice The chapters on world poverty human rights just war borders climate justice and global democracy have also been substantially revised and updated Centered on real world problems this textbook helps students to understand that global justice is not only a field of philosophical inquiry but also of practical importance Each chapter concludes with a helpful summary of the main ideas discussed study questions and a further reading guide
