Globalization As Evolutionary Process Modeling Global Change Rethinking Globalizations:

Globalization as Evolutionary Process George Modelski, Tessaleno Devezas, William R. Thompson, 2007-12-20 The term globalization has gained widespread popularity yet most treatments are either descriptive and or focused on changes in economic interconnectivity In this volume the concept is seen in broader terms as leading international experts from a range of disciplines develop a long term analysis to address the problems of globalization The editors and contributors develop a framework for understanding the origins and trajectory of contemporary world trends constructing testable and verifiable models of globalization They demonstrate how the evolutionary approach allows us to view globalization as an enterprise of the human species as a whole focusing on the analytical problem of global change and the rules governing those changes The emphasis is not on broad based accounts of the course of world affairs but selectively on processes that reshape the social of the human species the making of world opinion and the innovations that animate these developments Chapters are clustered into four foci One emphasizes the interpretation of globalization as an explicitly evolutionary process A second looks at historical sequences of such phenomena as population growth or imperial rise and decline as processes that can be modeled and not purely described The third cluster examines ongoing changes in economic processes especially information technology A final cluster takes on some of the challenges associated with forecasting and simulating the complexities of globalization processes This innovative and important volume will be of interest to students and scholars across the social sciences concerned with the phenomenon of globalization *Global Economy Contested* Marcus Taylor, 2008-05-13 Emphasizing the social processes that underpin the global economy and demonstrating how the uneven effects of global economic integration impact upon actors this book also underlines the reciprocal effects that reconfigure the terrain of global accumulation *Power and Transnational Activism* Thomas Olesen, 2010-12-03 Offering new and critical insights on global activism and power it features case studies on China and Tibet HIV AIDS climate change child labour the WTO women and the UN the global public sphere world social forums and global civil society **Globalisation,, Knowledge and Labour** Mario Novelli, Anibel Ferus-Comelo, 2009-12-16 Knowledge is playing an important role in the development of contemporary capitalism This book addresses the questions such as how labour movements learn and what strategies they deploy to defend their interests **A History of World Order and Resistance** Andre C. Drainville, 2013-06-17 This book combines theory with history to look into a dozen episodes of struggle over the concrete and situated terms of world ordering and it finds reasons to think that the contemporary movement of movements against neo liberal globalization has deeper roots and a broader history than is usually recognized Informed by case studies from the US the UK France South Africa Algeria the Philippines and Jamaica A History of World Order and Resistance examines how men and women are sometimes subjectified by world ordering and how they sometimes make themselves true subjects of their own global history The author an expert on resistance to world ordering situates the contemporary movement of movements against neo liberal globalization in a

broader historical framework to argue that resistance to world ordering has not only developed its very own unalienating mode of relation to the world economy but also sustained it over two hundred years without political mediation or representations Herein lies the heart of the on going world revolution against capital The book concludes with a radical polemic against the political organization of the multitude A History of World Order and Resistance will be of interest to students and scholars of political theory international political economy and globalization *Global Justice and the Politics of Information* Sky Croeser,2014-09-19 The global social justice movement attempts to build a more equitable democratic and environmentally sustainable world However this book argues that actors involved need to recognise knowledge including scientific and technological systems to a greater extent than they presently do The rise of the Occupy movement the Arab Spring and the Wikileaks controversy has demonstrated that the internet can play an important role in helping people to organise against unjust systems While governments may be able to control individual activists they can no longer control the flow of information However the existence of new information and communications technologies does not in itself guarantee that peoples movements will win out against authoritarian governments or the power of economic elites Drawing on extensive interviews and fieldwork this book illustrates the importance of contributions from local movements around the world to the struggle for global justice Including detailed case studies on opposition to genetically modified crops in the south of India and the digital liberties movement this book is vital reading for anyone trying to understand the changing relationship between science technology and progressive movements around the world This book will be of interest to students and scholars of International Politics Social movements Global Justice and Internet politics WORLD SYSTEM HISTORY-Volume I George Modelski and Robert A. Denemark,2009-09-19 World System History is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on World System History presents the study of the history of the world system World system history offers an array of tools with which to apprehend the future This volume discuss the essential aspects such as World Systems Analysis Big History Epistemology of World System History Long Term Processes and Cycles One World System or Many The Continuity Thesis in World System History World Population History States Systems and Universal Empires The Silk Road Afro Eurasian Connectivity Across the Ages Dark Ages in World System History The Kondratieff Waves as Global Social Processes Globalization in Historical Perspective Emergence of a Global Polity World Urbanization The Role of Settlement Systems in Human Social Evolution Democratization The World Wide Spread Of Democracy in The Modern Age The Rise of Global Public Opinion East Asia In the World System Incorporating North America into the Eurasian World System This volume is aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs **Occupying Subjectivity** Chris Rossdale,2017-10-02 This book explores a variety of forms of

radical political subjectivity It takes its cue from the 2011 uprisings in the Middle East and North Africa the Occupy Movement and the European Anti Austerity Movement alongside the wider opposition to authoritarian and neoliberal forms of governance from which they sprang in order to ask an urgent series of questions about the subject of radical politics Who or what is it that engages in resistance Who or what should they be And how are we to negotiate the many complexities of that second question The contributions drawing on a wide range of theoretical traditions offer a rich series of provocations towards new ways of conceptualising evaluating and imagining radical political praxis They engage different kinds of subjects including protestors dancers self burners academics settlers and humans in order to think through the ways in which contemporary subjects are constituted within and work to unsettle dominant relations of power Together the chapters open up spaces to think about how political and intellectual commitment to social change can be enlivened through attention to the subject of radical politics This book was published as a special issue of *Globalizations* *Free Trade and Transnational Labour* Andreas Bieler, Bruno Ciccaglione, John Hilary, Ingemar Lindberg, 2016-04-14 Resistance against free trade agreements based on an expanded trade agenda including issues related to intellectual property rights trade in services and trade related investment measures has increased since the demonstrations at the WTO ministerial conference in Seattle in 1999 While the WTO Doha negotiations have broken down the EU and USA are increasingly engaged in bilateral free trade agreements building on this expanded trade agenda Free trade strategies have increasingly become a problem for the international labour movement While trade unions in the North especially in manufacturing have supported free trade agreements to secure export markets for their companies trade unions in the Global South oppose these agreements since they often imply deindustrialisation The purpose of this volume is to understand better these dynamics underlying free trade policy making Academics trade union researchers and social movement activists analyse these issues in detail in order to explore possibilities for transnational labour solidarity This book was published as a special issue of *Globalizations* *The Global Governance of Food* Sara R. Curran, April Linton, Abigail Cooke, Andrew Schrank, 2013-09-13 Food provides a particularly exciting and grounded research site for understanding the mechanisms governing global transactions in the 21st century While food is intimately and fundamentally related to ecological and human well being food products now travel far flung trade routes to reach us International trade in food has tripled in value and quadrupled in volume since 1960 and tracing the production movement transformation and consumption of food necessitates research that situates localities within global networks and facilitates our capacity to see the trees and the forest by zooming from the global to the local and back to the global Our need for food is a constant how we acquire food is a variable and the production commercialization and consumption of food therefore offer an invaluable window onto the globalization of the world we inhabit Food provides an ideal site for answering the fundamental questions of governance of central concern to globalization debates This book presents recent and interdisciplinary scholarship about the variety of mechanisms governing global food systems and their

impacts on human and environmental well being This book was previously published as a special issue of Globalizations

Challenging Euro-America's Politics of Identity Jorge Luis Andrade Fernandes, 2008-01-07 In this fascinating book Jorge Luis Andrade Fernandes critically examines the impact of colonialism and postcolonial migration on the politics and identity of Euro American imperial powers It considers how outsiders are part of the construction of the native identity of the nation state and also how they challenge its essential coherence when they return to the centre in our increasingly globalized world Engaging in a theoretically motivated discussion of a range of sources film fiction political theory and state policy the volume traces the nomadic movement of bodies across national frontiers helping us to question any natural link between nation states and identities and between places and peoples This is not merely a theoretical problem as Fernandes relates it to the very current crisis of nativistic multicultural identity in the West He examines how politics takes shape in transnational social and cultural encounters and how this new politics is not just about containing aliens but also contains fruitful possibilities for different modes of being *Challenging Euro America s Politics of Identity* will be of interest to advanced students and scholars in politics geography postcolonial studies cultural studies African and African American studies comparative literature American studies and Ethnic studies
