## **Globalization Capitalism And Its Alternatives:**

*Globalization* Leslie Sklair, 2002 Capitalist globalization has been instrumental in globalizing civil and political rights all over the world as a condition of free markets and trade but capitalist globalizers have no answer to the rapidly accelerating demands for universal economics and social rights expressed in the enormous growth of local national multinational and global NGOs and anti globalization movements In this book based on his highly successful *Sociology of the Global System* Leslie Sklair focuses on alternatives to global capitalism arguing strongly that there are other alternative futures that retain and encourage the positive aspects of globalization whilst identifying what is wrong with capitalism The negative aspects of capitalist globalization are explored in a new critique which argues that there are two main crises of capitalist globalization the class polarization crisis and the crisis of ecological unsustainability The book also presents a new analysis of a long term alternative to global capitalism the globalization of human rights *Global Shaping and Its Alternatives* William K.

Carroll, Yildiz Atasoy, Y?ld?z Atasoy, 2003-01-01 *Global Shaping and its Alternatives* offers a unique series of reflections on the connections between market capitalism the politics of alternatives and the cultural elaboration of social change It argues that there is a need for an alternative explanatory framework on globalization one that rejects fatalism and highlights the dynamic roles of states NGOs local fractions of capital democratic movements and gendered social relations Without understanding how global shaping is taking place and how it affects human life across the globe there can be no transformational possibility for humanizing our conditions of existence **The Routledge Companion to Alternative Organization** Martin

Parker, George Cheney, Valérie Fournier, Chris Land, 2014-01-03 Despite the Great Recession slightly different forms of global capitalism are still portrayed as the only game in town by the vast majority of people in power in the world today Unbridled growth trade liberalisation and competition are advocated as the only or best ways of organizing the contemporary world Unemployment yawning gaps between rich and poor political disengagement and environmental devastation are too often seen as acceptable side effects of the dominance of neo liberalism But the reality is that capitalism has always been contested and that people have created many other ways of providing for themselves This book explores economic and organizational possibilities which extend far beyond the narrow imagination of economists and management theorists Chapters on co operatives community currencies the transition movement scrounging co housing and much more paints a rich picture of the ways in which another world is not only possible but already taking shape The aim of this companion is to move beyond complaining about the present and into exploring this diversity of organisational possibilities Our starting point is a critical analysis of contemporary global capitalism is merely the opening for thinking about organizing as a form of politics by other means and one that can be driven by the values of solidarity freedom and responsibility This comprehensive companion with an international cast of contributors gives voice to forms of organizing which remain unrepresented or marginalised in organizational studies and conventional politics yet which offer more promising grounds for social and

environmental justice It is a valuable resource for students activists and researchers interested in alternative approaches to economy and society in a variety of disciplinary and interdisciplinary fields

**Globalization and the Mission of the Church** Neil J. Ormerod, Shane Clifton, 2009-11-26 Various social political economic and cultural commentators are presently arguing that human history is reaching a decisive stage in its development a stage marked by increased interconnection between peoples the compression of space and time a sharing of ideas at unprecedented levels global trade and finance and so on The shorthand word used to encompass these phenomena is globalization Some embrace it others reject it while still others dispute its existence But with the abundance of literature and debate that it generates the topic cannot be ignored From its inception in the missionary mandate of Jesus Matthew 28 Christianity has had a global dimension to its mission Christianity is not a spectator to globalization but one of its agents one of the forces at work which have extended interconnection between peoples shared ideas and promoted social political and cultural links The purpose of the present work is not to provide a complete response to the question of the mission of the church in a globalizing world but to establish a framework within which answers may be sought Grounded in the writings of Bernard Lonergan and Robert Doran it develops a theology of history and addresses the churches response to the impact of globalization on vital social cultural personal and religious values The project brings together the perspectives of Catholicism and Pentecostalism the former providing a depth of wisdom and tradition the latter drawing on the insight of a newly emerging movement that has taken root in every continent with remarkable energy and enthusiasm

**Sociological Theory in the Contemporary Era** Scott Appelrouth, Laura Desfor Edles, 2010-11-29 Uses a proven text reader hybrid format to introduce contemporary theorists their original works and a theoretical framework for understanding them Praise for Sociological Theory in the Contemporary Era Current users of most other theory texts should take notice of Sociological Theory in the Contemporary Era as it rivals existing volumes with its accessibility and its selections Dustin Kidd Temple University TEACHING SOCIOLOGY Vol 36 2008 April 161 184 Sociological Theory in the Contemporary Era Second Edition combines well edited important original writings from sociology s core contemporary theorists with introductory text that provides a historical and theoretical framework for understanding them Authors Scott Appelrouth and Laura Desfor Edles use this unique text reader approach to introduce students to contemporary sociological theory in a lively and engaging fashion The text reader provides not only a biographical and theoretical summary of each theorist s works but also an overarching scaffolding that students can use to examine compare and contrast each theorist s major themes and concepts The book also offers discussions of past social and intellectual milieus to provide a holistic picture of the development of the theories discussed Contributor to the SAGE

Teaching Innovations and Professional Development Award *Capitalism and Its Alternatives* Chris Rogers, 2014-08-14 The global economic crisis has catalysed debates about the merits of capitalism as a system for organizing production distribution and exchange Political elites have argued that capitalism is not fundamentally pernicious or crisis prone and can be

successfully reformed with the right set of policies Conversely many have argued that a wholesale change of attitude towards the status and creation of wealth in contemporary society is required if crises of this kind are to be prevented in the future In *Capitalism and Its Alternatives* Chris Rogers provides a critical introduction to theories of capitalism and to the forms of its crises in historical and contemporary contexts as well as reflecting on the practice of anti capitalism and the ways that economic and social relations are shaped reshaped and resisted Crucially the book asks two key questions What alternatives to capitalism exist And by what processes and through what institutions might they be achieved **Capitalist**

**Globalisation, Corporated Tourism and Their Alternatives** Freya Higgins-Desbiolles,2009 Any realistic understanding of contemporary tourism in the 21st century must be grounded in a context of the dynamics of capitalist globalisation

Sociologist Leslie Sklair's conceptualisation of capitalist globalisation and its dynamics as expressed in his *Sociology of the Global System* 2002 is employed to understand the corporatised tourism phenomenon and explain the resistance that it sparks This discussion explains how a corporatised tourism sector has been created by transnational tourism and travel corporations professionals in the travel and tourism sector transnational practices such as the liberalisation being imposed through the General Agreement on Trade in Services negotiations and the culture ideology of consumerism that tourists have adopted **Global Neoliberalism and Its Alternatives** David Lane,2024 This title offers an exhaustive diagnosis of global capitalism Proposing a novel system of economic and political coordination based on a combination of market socialism and state planning it provides crucial insights for thinking about alternatives to capitalism

**A Theory of Global Capitalism** William I. Robinson,2004-03-12 In this book sociologist William Robinson offers a theory of globalization that follows the rise of a new capitalist class and a new type of state formation He explains how global capital mobility has allowed capital to reorganize production worldwide in accordance with a whole range of considerations that allow for maximizing profit making opportunities This worldwide decentralization and fragmentation of the production process has taken place alongside the centralization of command and control of the global economy in transnational capital In turn this economic reorganization finds a political counterpart in the rise of the transnational state In the future Robinson argues hegemony will be exercised not by a particular nation state but by the new global ruling class who regardless of their nationality tend to share similar lifestyles and interact through expanding networks of this transnational state In this way the process of globalization is unifying the world into a single mode of production that is increasingly integrating different countries and regions into a new global economy and society Robinson concludes that because the new global capitalism is rife with **Globalization of Capital**

**and the Nation-state** Berch Berberoglu,2003 As transnational capital has become a mighty force controlling the economies of advanced and less developed capitalist countries around the world capitalism and capitalist relations of production have spread to and dominated societies and social relations in remote parts of the globe The resulting globalization of capital has given a free reign to the transnationals to impose on society capitalist practices on a global scale such that only the biggest

and most powerful capitalist monopolies have become the real beneficiaries      **Globalization and Change** Berch Berberoglu,2005 Globalization and Change The Transformation of Global Capitalism explores the origins development and transformation of globalization from a critical and historical perspective Berch Berberoglu brings together eight essays authored by prominent sociological scientists from across the nation that examine the dynamics of globalization through an analysis of class relations and class struggles that define the contemporary global political economy By undertaking a careful examination of the contradictions inherent in capitalist globalization this book provides a thorough understanding of the issues behind the global capitalist economy and the struggle against globalization while at the same time offering a viable solution to the growing exploitation of labor throughout the world This study on global capitalism informed by class analysis is essential to anyone interested in the political implications of globalization and the unfolding class struggles      Fictions of Globalization James Annesley,2006-04-24 The globalization debate has become a dominant question in many disciplines but has only tended to be covered within literary studies in the context of postcolonial literature This book focuses on reading contemporary novels in relation to globalization      Rethinking Imperialism Ray Kiely,2010-04-09 Imperialism has become a key focus of debate about world politics in the post 9 11 world This major new text provides a systematic reappraisal of the evolution of the phenomenon and the concept from the 19th century as the basis for a reassessment of Globalization and US hegemony in the world today      Six Essays on Global Order and Governance Harto Hakovirta,2003      **Political Economy and the Changing Global Order** Richard Stubbs,Geoffrey R. D. Underhill,2006 Covering the basics necessary for a course in international political economy IPE this text comes from a non American critical perspective and the contributors are drawn from prominent scholars of IPE around the world      *Globalization and Economy: Globalizing labour* Paul Warren James,2007 Globalization and Economy is the second set which looks at economics broadly conceived including global markets global finance global economic institutions and global labour      *Globalization* Robert Goehlert,2003

**Globalization in the 21st Century** Berch Berberoglu,2010-03-15 This book examines the development and transformation of global capitalism in the late 20th and early 21st century It analyzes the dynamics and contradictions of the global political economy through a comparative historical approach based on class analysis After providing a critical overview of neoliberal capitalist globalization over the past three decades the book examines the emergence of new forces on the global scene and discusses the prospects of change in the global economy in a multi polar direction in the decades ahead The book concludes by focusing on the mass movements that are playing a central role in bringing about the transformation of global capitalism      *Culture, Society, Economy* Don Robotham,2005-03-23 Robotham offers here a clear headed expos of the limits of classical liberalism in the face of world production today His theme is both urgent and iconoclastic There is an unusual clarity about the exposition and a drive that comes from passionate engagement combined with long experience reading and reflection Keith Hart Goldsmiths College London In Culture Society and Economy Don Robotham examines the

failure of recent social theory to grasp the problems of globalization and the emergence of corporate monopoly capital and sets out his own argument for a radical solution He argues that the neglect of economics by both cultural studies and social theory has weakened the ability to develop viable alternatives to present day capitalist globalization With deep awareness of and reference to current events and contemporary trends the author presents a detailed critique of cultural studies in particular Stuart Hall and Paul Gilroy Giddens theory of risk society Scott Lash and John Urry s economies of signs and space Manuel Castells theory of network society The final chapters make a unique argument that the solution to the problems of globalization lies in more globalization rather than adopting an anti globalization or localization position Don Robotham proposes more effective centralized institutions for governing the world economy in other words world government **The Blackwell Encyclopedia of Sociology: A-B** George Ritzer,2007
