Globalization Second Edition A Critical Introduction:

Globalization, Second Edition Jan Aart Scholte, 2005-10-07 This is a systematically revised and updated new edition of a highly acclaimed text which was an immediate bestseller on courses around the world The second edition takes a broader perspective giving increased coverage of other dimensions of globalization alongside its core focus on the rise of supraterritoriality which the author argues is globalization's most distinctive feature

Theorizing Globalization Marko Ampuja, 2012-07-25 In this work Marko Ampuja offers a critical reassessment of mainstream perspectives on globalization challenging their media centrism and their lack of historical materialist analysis of global capitalism and the power of neoliberalism

Environmentalism of the Rich Peter Dauvergne, 2018-02-09 What it means for global sustainability when environmentalism is dominated by the concerns of the affluent eco business eco consumption wilderness preservation Over the last fifty years environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization colonialism and globalization Activists and policymakers have fought hard to make the earth a better place to live But has the environmental movement actually brought about meaningful progress toward global sustainability Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling While it's good that for example Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis More eco products can just mean more corporate profits consumption and waste Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever more more growth more sales more consumption is swamping environmental gains

Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability
