**Global Energy Policy and Security** Walter Leal Filho, Vlasios Voudouris, 2013-09-03 Despite efforts to increase renewables the global energy mix is still likely to be dominated by fossil fuels in the foreseeable future particularly gas for electricity and oil for land air and sea transport The reliance on depleting conventional oil and natural gas resources and the geographic distribution of these reserves can have geopolitical implications for energy importers and exporters Global Energy Policy and Security examines the security of global and national energy supplies as well as the sensitivity and impacts of sustainable energy policies which emphasize the various political economic technological financial and social factors that influence energy supply demand and security Multidisciplinary perspectives provide the interrelated topics of energy security and energy policy within a rapidly changing socio political and technological landscape during the 21st century Included are two main types of interdisciplinary papers One set of papers deals with technical aspects of energy efficiency renewable energy and the use of tariffs The other set of papers focuses on social economic or political issues related to energy security and policy also describing research practical projects and other concrete initiatives being performed in different parts of the world This book will prove useful to all those students and researchers interested in the connections between energy production energy use energy security and the role of energy policies *Handbook on Climate Change and International Security* Maria J. Trombetta, 2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue the threats it poses and the political and academic debates it has prompted Framing climate change as a security issue it explores the ways relevant actors states and international organizations have conceptualized climate security and its associated threats The Geopolitics of the Global Energy Transition Manfred Hafner, Simone Tagliapietra, 2020-06-09 The world is currently undergoing an historic energy transition driven by increasingly stringent decarbonisation policies and rapid advances in low carbon technologies The large scale shift to low carbon energy is disrupting the global energy system impacting whole economies and changing the political dynamics within and between countries This open access book written by leading energy scholars examines the economic and geopolitical implications of the global energy transition from both regional and thematic perspectives The first part of the book addresses the geopolitical implications in the world's main energy producing and energy consuming regions while the second presents in depth case studies on selected issues ranging from the geopolitics of renewable energy to the mineral foundations of the global energy transformation to governance issues in connection with the changing global energy order Given its scope the book will appeal to researchers in energy climate change and international relations as well as to professionals working in the energy industry Energy Abstracts for Policy Analysis, 1982 Energy Policy Noah B. Jacobs, 2009 Energy policy is the manner in which a given entity often governmental has decided to address issues of energy development including energy production distribution and consumption The attributes of energy policy may include legislation international treaties

incentives to investment guidelines for energy conservation taxation and other public policy techniques A national energy policy comprises a set of measures involving that country's laws, treaties and agency directives This book presents the latest research on the economic effects, security aspects and environmental issues connected with energy policy **Energy Supply and Pipeline Transportation** Mo Mohitpour, 2008 This timely book focuses on the economic and global issues pertaining to delivery of energy resources particularly fossil fuels such as oil, gas and coal The author provides a wealth of data and graphical material based on his many years of research in the energy supply and transportation field The book covers four major topics: Energy Sources and Supplies, Market Demand by Region, Energy Transportation Modes, Issues and Pipeline Transportation **BOOK JACKET** Energy and Conflict Prevention Greg Austin, Marie-Ange Schellekens-Gaiffe, 2007 Although almost no major war has been exclusively related to the control of an oil or gas field, disputes over hydrocarbon reserves have regularly been an undeniable part of many armed conflicts Disputes over the use of nuclear energy lie at the heart of several current confrontations that have a high potential to turn into armed conflict The papers in this volume address the clear need to reduce international tension on energy security issues while addressing the open divides between energy exporting and energy importing states and hidden tensions between developed energy importers North America, Europe and Japan and emerging energy importers China, India, developing Asia and Africa This is a major though latent threat not to be ignored by key political and business decision makers *Views & Policies*, 2006 *Energy Research Abstracts*, 1993 *Library Journal*, 1977 The Handbook of Global Energy Policy Andreas Goldthau, 2013-03-14 This is the first handbook to provide a global policy perspective on energy bringing together a diverse range of international energy issues in one volume Maps the emerging field of global energy policy both for scholars and practitioners the focus is on global issues but it also explores the regional impact of international energy policies Accounts for the multi-faceted nature of global energy policy challenges and broadens discussions of these beyond the prevalent debates about oil supply Analyzes global energy policy challenges across the dimensions of markets, development, sustainability and security and identifies key global policy challenges for the future Comprises newly commissioned research by an international team of scholars and energy policy practitioners *Defence Force Journal*, 1984 *The Energy Journal*, 2001 *Climate Policy*, 2007 **Energy Users Report**, 1978 **Energy Technology Choices** United States. Congress. Office of Technology Assessment, 1991 **Ready to Lead?** Robin Niblett, 2009 This report by Director of Chatham House Dr Robin Niblett draws on Chatham House's international expertise and contacts to offer an in-depth analysis of President Obama administration's ambitions to renew US leadership in the world The report explores how the Obama administration can promote US global leadership at a time when many of the pillars of its international role have been weakened Looking at how the US will need to craft new ways of using its unique power and capacity to influence others the report's key conclusions are as follows America needs to change how it uses its power by sharing leadership where partners have as much or more to offer America needs to focus less on its

opponents and more on supporting its friends and allies in Europe Latin America the Middle East and Asia America needs to place less emphasis on individual leaders and parties and more on governance and political processes *Contemporary India* ,2005 **Changing Environments** Dick Morris,2003-04-11 Are we humans destroying the environments in which we live or is environmental change inevitable and natural How has the relationship between human societies and environments changed since pre history Will human population growth outpace the available resources of land and water Is global warming and climate change already out of control What can economic and political models tell us about international development Changing Environments takes a broad interdisciplinary approach to such questions drawing on ideas from science technology social science and humanities to examine how and why environments change as a result of natural and human mediated processes It draws on examples from around the world and includes consideration of the scales of time and space over which changes in our environments occur the effects on environments that arise from human use of the resources of energy land water and the atmosphere the role of technology and economics in shaping human actions on our environments the use and limitations of different models for thinking about environmental change The book is part of a series entitled Environment Change Contest and Response that forms a large part of an Open University course on environmental matters The other books in the series are Understanding Environmental Issues Contested Environments Environmental responses

**The New Walford Guide to Reference Resources** Ray Lester,2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort For those looking for a selective and evaluative reference resource that really delivers on its promise look no further In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful With an emphasis on quality and sustainability the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher
