Manahan,2006-10-20 Formally established by the EPA nearly 15 years ago the concept of green chemistry is beginning to come of age Although several books cover green chemistry and chemical engineering none of them transfer green principles to science and technology in general and their impact on the future Defining industrial ecology Environmental Science and Tec **Global Warming & Climate Change** ,2006 What do hurricanes melting glaciers rising ocean levels eroding coastlines worldwide crop damage food shortages absence of rainfall shrinking aquifers wildfires and lowered water tables all have in common These are some of the possible results of an increase in the accumulation of greenhouse gases in the atmosphere commonly referred to as global warming Scientists study climate change from the perspective of eons of the earth s history as well as the short term effects of recent human induced changes in the atmosphere while engineers attempt to devise technological solutions and politicians struggle with international protocols and methods of enforcement The ever increasing demand for fossil fuels and energy consumption worldwide complicates the problem Are there solutions Can technological innovations in energy production conservation methods and even innovative market solutions reverse the current trends soon enough These are the questions that confront us as we face the possibility of crossing the point of no return The following guide is intended for those who are looking for a review of the literature and vetted online resources on these topics Materials cited are available in the collections of the Library of Congress or on the Internet **Are International Human Rights Instruments Effective In Protecting People's Rights from the Global Effects of Climate Change?** Nouha Rouabah,2018-01-11 Master s Thesis from the year 2017 in the subject Politics Topic Public International Law and Human Rights grade A Birkbeck University of London language English abstract This study seeks to address the issue of climate change through a human rights lens by focusing on the causes of climate change and its impacts on both the environment and human rights It highlights the close link between capitalist industrialization and environmental degradation and explains how this consequently leads to human rights violations This research tackles human rights approach to climate change with a special focus on international human rights instruments mainly the two international covenants the ICCPR and the ICESCR it seeks to understand whether they impose international obligations on states to protect human rights from the adverse effects of climate change and how those imposed duties can be enforced to effectively protect people s rights Unfortunately this paper will reach to the conclusion that the existing human rights law does not adequately protect human rights from the lethal threat of climate change due to the absence of a universally

recognized right to a healthy environment moreover despite the possibility of the extraterritorial application of the ICESCR the political will of states to cooperate under the provisions of the covenant to face the issue of climate change seems to be also absent
