Diversity And Difference In Early Modern London:

Diversity and Difference in Early Modern London Jacob Selwood, 2010 Diversity and Difference in Early Modern London investigates multiculturalism in London during the sixteenth and seventeenth centuries as well as developing notions of Englishness Rather than relying upon literary or theatrical representations the study emphasizes day to day practice drawing upon petitions government records guild minute books and economic and taxation disputes offering a new perspective that will be of interest both to scholars of the early modern English metropolis and to historians of race migration imperialism and the wider Atlantic world

Diversity and Difference in Early Modern London Jacob Selwood, 2016-05-23 London in the sixteenth and seventeenth centuries was a surprisingly diverse place home not just to people from throughout the British Isles but to a significant population of French and Dutch immigrants to travelers and refugees from beyond Europe's borderlands and from the 1650s to a growing Jewish community Yet although we know much about the population of the capital of early modern England we know little about how Londoners conceived of the many peoples of their own city Diversity and Difference in Early Modern London seeks to rectify this addressing the question of how the inhabitants of the metropolis ordered the heterogeneity around them Rather than relying upon literary or theatrical representations this study emphasizes day to day practice drawing upon petitions government records guild minute books and taxation disputes along with plays and printed texts It shows how the people of London defined belonging and exclusion in the course of their daily actions through such prosaic activities as the making and selling of goods the collection of taxes and the daily give and take of guild politics This book demonstrates that encounters with heterogeneity predate either imperial expansion or post colonial immigration In doing so it offers a perspective of interest both to scholars of the early modern English metropolis and to historians of race migration imperialism and the wider Atlantic world An empirical examination of civic economics taxation and occupational politics that asks broader questions about multiculturalism and Englishness this study speaks not just to the history of immigration in London itself but to the wider debate about evolving notions of national identity in the sixteenth and seventeenth centuries

The Place of the Social Margins, 1350-1750 Andrew Spicer, Jane L. Stevens Crawshaw, 2016-08-12 This interdisciplinary volume illuminates the shadowy history of the disadvantaged sick and those who did not conform to the accepted norms of society It explores how marginal identity was formed perceived and represented in Britain and Europe during the medieval and early modern periods It illustrates that the identities of marginal groups were shaped by their place within primarily urban communities both in terms of their socio economic status and the spaces in which they lived and worked Some of these groups such as executioners prostitutes pedlars and slaves performed a significant social and economic function but on the basis of this were stigmatized by other townspeople Language was used to control and limit the activities of others within society such as single women and foreigners as well as the victims of sexual crimes For many such as lepers and the disabled marginal status could be ambiguous cyclical or short lived and affected by

Understanding Nationalism Birgitta Hermannsson, 2005 Abstract en This dissertation is an attempt to understand nationalism in a general sense and Icelandic nationalism in particular For this purpose the concepts of ideology political culture discourse and political language are pushed to the forefront as viable analytical tools to take on the difficult phenomena of nationalism It is argued that this perspective is useful in conceptualizing and studying nationalism Moreover it serves both as a benchmark to evaluate the theoretical field as well as guiding the empirical study There is no consensus on either the correct definition of nationalism or the proper theoretical approach to study it This is a result of the highly contested nature of nationalism and the politically infused character of all attempts to define it Both the subject the scholar and the object nationalism are part of changing historical circumstances which make all attempts to objectify nationalism fruitless as well as making our understanding conditional The problematic of the influential modernist school namely state formation democratic rule and economic transformation is accepted as crucial for our understanding of nationalism Its understanding of culture and ideology is however shown to be too instrumental and elitist Cultural production and reception must be given greater prominence The role of external models and the problem of imitation are clearly important for the intellectual mobilization of nationalism The desired model for imitation is not accepted unchanged but must in some way be adapted to the prevailing traditions or conventions of the adapting country
