Ebook Towards Post Bertalanffy Systemics Contemporary Thinking:

Towards a Post-Bertalanffy Systemics Gianfranco Minati, Mario Abram, Eliano Pessa, 2015-12-23 This book contains the proceedings of the Sixth National Conference of the Italian Systems Society The title Towards a post Bertalanffy Systemics aims to underline the need for Systemics and Systems Science to generalize theoretically concepts related to complexity the great enemy of Bertalanffy Systemics Hopefully this goal should be achieved by working in an inter disciplinary and trans disciplinary fashion using systemic concepts arising from various disciplines and from the original or Bertalanffy Systemics as well The interdisciplinary nature of the original Systemics and its power of generalization were given overall by the fact that the problems and solutions of one discipline become problems and solutions for another Today the modeling and interpretation of multidisciplinary approaches and representations makes easier to recognize these interconnections The context however has changed dramatically Of course the challenge is still to find theoretical generalizations and applications even where we have a lot of specificities but we know very little on how to combine them We cannot however simply replace the old with the new but we must introduce strategies to recognize represent model and act on new levels combining multiple representations functions and emergence In many disciplines this has been already done and inevitably well since targets and projects are well specified and oriented The challenge is to do it for Systemics with the vocations of cultural and theoretical generalization Examples of new issues introduced by such theoretical disciplinary improvements dealt with by many disciplines include the study of mesoscopic or middle way level of multiple and dynamic coherence of equivalence non equivalence of fractality of networks of non causality of non invasiveness of non prescribability of non separability of quasi properties of symmetry properties of topological dynamics as well as of quantum theories and concepts The conference was devoted to identifying discussing and understanding possible interrelationships of theoretical disciplinary improvements recognized as having prospective fundamental roles for a new post Bertalanffy Systemics The latter should be able to deal with problems related to complexity in a generalized way In this context the inter disciplinarity should consists for instance in a disciplinary reformulation of problems as from algebraic to geometrical from military to political from biological to chemical while the trans disciplinarity should be related to the study of such reformulations and their properties The Italian Systems Society AIRS was founded in the 1996 The AIRS is a network of academicians scientists researchers and professionals involved in Systemics A partial list of disciplines represented is Architecture Biology Economics Education Engineering Mathematics Neurosciences Medicine Music Philosophy Psychology Physics Previous conferences had as open lecturers professors Arecchi Haken Klir and Kauffman The proceedings have been published as 1 Minati G ed 1998 Proceedings of the first Italian Conference on Systemics Apogeo Scientifica Milan Italy 2 Minati G and Pessa E eds 2002 Emergence in Complex Cognitive Social and Biological Systems Kluwer New York 3 Minati G Pessa E and Abram M eds 2006 Systemics of Emergence Research and Applications Springer New York 4 Minati G Abram M and Pessa E eds 2009 Processes

of emergence of systems and systemic properties Towards a general theory of emergence World Scientific Singapore 5

Minati G Abram M and Pessa E eds 2012 Methods Models simulations and approaches towards a general theory of change World Scientific Singapore

Immersive Systemic Knowing Raghav Rajagopalan, 2020-10-16 This book advances systems thinking by introducing a new philosophy of systemic knowing It argues that there are inescapable limits to rational understanding Humankind has always depended on extended ways of knowing to complement the rational analytic approach The book establishes that the application of such methods is fundamental to systemic practice The author advocates embracing two modes of consciousness intentionality which Western philosophy has long recognized and non intentional awareness which Eastern philosophy additionally highlights The simultaneity of these two modes of consciousness and the variety of knowings they spawn are harnessed for a more holistic systemic knowing Four practices from fields related to systems thinking are examined two contemporary action research methodologies from the US and the UK the Sumedhian Indian approach to inquiry about processes within groups and a technique of group psychotherapy originating in Eastern Europe Each of these systematically harnesses knowing using both modes of consciousness Therefore the author insists such approaches must be included in systemic practice in purposeful and methodical juxtaposition to rational analytic ways The book provides examples and guidelines for deployment All researchers and practitioners of systems thinking and action research must read this book Raghav has craftfully blended Eastern and Western wisdom He uses his immersion into Eastern ways of knowing practically to elaborate the systems philosophy in rich detail He has incorporated from cooperative inquiry as action research the idea of four ways of knowing practical propositional presentational and experiential to bolster the foundations of systems thinking SHANKAR SANKARAN Professor University of Technology Sydney Australia President International Society of Systems Sciences ISSS 2019 2020 This is a book with the potential to stimulate the emergence of a new paradigm Raghav shows that systems thinking can transcend rational analysis and incorporate other ways of knowing such as arts based methods also rather than be overly preoccupied with striving for change there is value in simply abiding which comes with a deep appreciation of the ecological relationships we are part of It is not that rational analysis is wrong it is that it is only part of a genuinely transformative practice GERALD MIDGLEY Co Director Centre for Systems Studies University of Hull former President ISSS 2013 14 Raghav Rajagopalan's writing on generating deep appreciation for the social and ecological interdependencies ties in closely with my own work The philosophical ideas he develops contain the tracings and essential tones of Gregory Bateson's idea of Mind as a process of living complexities reaching well beyond the notion of the body This book demonstrates outstanding erudition and deep compassion at the same time It should delight the adventurous reader unafraid of big questions NORA BATESON President of the International Bateson Institute

Ignite the flame of optimism with is motivational masterpiece, **Ebook Towards Post Bertalanffy Systemics Contemporary Thinking** . In a downloadable PDF format (*), this ebook is a beacon of encouragement. Download now and let the words propel you towards a brighter, more motivated tomorrow.
