Social Science Instruction

Competency 6.06

The teacher understands and applies social science knowledge and skills to plan, implement, and evaluate learning.

The beginning teacher:

- a. understands the state social studies content and performance standards that establish the Texas Essential Knowledge and Skills (TEKS);
- b. understands the vertical alignment of the social sciences in the Texas Essential Knowledge and Skills (TEKS) from grade level to grade level, including appropriate knowledge and skills;
- c. understands and uses social studies terminology correctly;
- d. understands the importance of stages of student growth and development by designing and implementing effective learning experiences in the social sciences (e.g., knowledge of one's impact on self, family, and communities, sharing, listening, resolving, making compromises in groups);
- e. knows and applies effective, developmentally appropriate instructional practices, activities, technologies, and materials to promote students' knowledge and skills in the social sciences;
- f. knows and applies currently available technology as a tool for learning and communicating social studies and concepts;
- g. knows and uses effective instructional strategies, activities, technologies, and materials to promote students' knowledge and skills in the social sciences;
- h. understands how to properly describe use of social science skills, vocabulary, and research tools, including currently available technological tools;
- i. applies indicators that measure skills, concepts, and ideas across different social science disciplines;
- j. provides and facilitates instruction that uses students' prior conceptions, relevant knowledge and methods in the social sciences within their content area;
- k. uses a variety of formal and informal assessments and knowledge of the TEKS to determine students' progress and needs and to use that information that addresses the strengths, needs, and interests of all students, including English language learners and students with special needs;
- l. understands and makes practical applications of social science issues and trends;
- m. knows how and other practices to represent geographic, political, historical, economic, and cultural features, distributions, and relationships;
- n. communicates the value of social studies education to students, parents/guardians, colleagues, and the community.

Social Studies Content

The purpose of social studies instruction is to help students develop the ability to make informed and reasoned decisions for the public good as citizens of a culturally diverse, democratic society. An integrated study of social studies will promote the type of civic competence required of citizens of a democratic society. The common focus of social studies is human behavior. A well-informed social studies curriculum will:

- have clear goals and objectives;
- cover subject matter that interests students;
- cover a broad number of ideas and topics in depth, rather than superficially covering many topics;
- include a variety of instructional resources;
- have an emphasis on relationships among ideas, people, places, and events.

Elementary grades provide the foundation for an understanding of history, geography, economics, government, citizenship, culture, science, technology, and society, and social studies skills. Content for social studies gradually moves from home, school, and community to increased understanding of the greater community, state, nation, and world. The focus gradually shifts outward from the self to the larger world.
