Production Technology for Deep Reservoirs Yan Peng,Yishan Liu,Hongyan Qu,Feng Dong,Jiehao Wang,2024-11-28

Underground energy is important for the whole society development but conventional underground energy is becoming exhausted The energy for deep reservoirs usually 3500m for petroleum engineering 1000m for mining engineering is diverse including not limited shale gas oil tight gas oil hot dry rock geothermal reservoirs and coal gasification Although it has abundant reserves the energy production from deep reservoirs is difficult in stimulations because the geological conditions for those deep reservoirs are tougher than those for conventional reservoirs such as high in situ stress obvious heterogeneity in rock properties and complex natural fracture networks Meanwhile common technologies also have environmental impacts The development trend of production technology for deep reservoirs requires it to be environment friendly or decrease environmental impacts at least CO₂ utilization may achieve this environmental aim In order to efficiently produce energy from deep reservoirs technological innovation is booming around North America Europe and Asia

North Sea Oil and Gas Reservoirs—II A.T. Buller,2012-12-06 The first North Sea Oil and Gas Reservoirs Conference was held in Trondheim in 1985 as part of the Norwegian Institute of Technology s 75th anniversary celebrations Favourable reactions from the delegates prompted the Committee to re run the event some three and a half years later and it is now intended that the Conference be held on a regular basis as long as there is a demand for this type of gathering The objectives of the 1989 Conference which were broadly similar to those of the previous one were a to bring together those engaged in various geoscientific and reservoir engineering aspects of North Sea Oil and gas reservoirs in one forum b to demonstrate wherever possible the interdependence of the various disciplines and specializations c to promote innovative synergistic approaches to research and development programmes aimed at North Sea conditions and d to reflect current trends in the reservoir sciences Naturally there was no place for specialist parallel sessions in a Conference aimed at encouraging interdisciplinary integration and awareness
