Essentials of Economics (2nd edition)

John Sloman

Introduction

2. *Would redistributing incomes from the rich to the poor reduce the overall problem of scarcity?*

Yes, to the extent that the gain to the poor is greater than the cost to the rich. Nevertheless, it is difficult to give a categorical answer to this question. It could be argued that £1 gained by a poor person is more valuable to them than £1 sacrificed by a rich person: the more money you have the less valuable to you is each additional £1. If this is so, there would be a net gain in human welfare by such as redistribution. The problem, however, is in comparing one person's happiness with another: happiness is not something that lends itself to measurement.

4. *Which of the following are macroeconomic issues, which are microeconomic ones and which could be either depending on the context?*

- (a) *Inflation.*
- (b) *Low wages in certain service industries.*
- (c) *The rate of exchange between the pound and the euro.*
- (d) *Why the price of cabbages fluctuates more than that of cars.*
- (e) *The rate of economic growth this year compared with last year.*
- (f) *The decline of traditional manufacturing industries.*

- (a) Macro. It refers to a *general* rise in prices across the whole economy.
- (b) Micro. It refers to *specific* industries
- (c) Either. In a *world* context, it is a micro issue, since it refers to the price of *one* currency in terms of *one* other. In a national context it is more of a macro issue, since it refers to the euro exchange rate at which all UK goods are traded internationally. (This is certainly a less clear-cut division than in (a) and (b) above.)
- (d) Micro. It refers to *specific* products.
- (e) Macro. It refers to the *general* growth in output of the economy as a whole.
- (f) Micro (macro in certain contexts). It is micro because it refers to *specific* industries. It could, however, also help to explain the *macroeconomic* phenomena of high unemployment or balance of payments problems.
