Futureproofing Engineering Education for Global Responsibility Michael E. Auer, Tiia Rüütman, 2025-03-22. This book contains papers in the fields of Collaborative learning, Digital transition in education, AI and learning analytics in engineering education, Diversity in engineering education. The authors are currently witnessing a significant transformation in the development of education on all levels and especially in post secondary and higher education. To face these challenges, higher education must find innovative and effective ways to respond in a proper way. Changes have been made in the way we teach and learn, including the massive use of new means of communication such as videoconferencing and other technological tools. Moreover, the current explosion of artificial intelligence tools is challenging teaching practices maintained for centuries. Scientifically based statements as well as excellent best practice examples are necessary for effective teaching and learning engineering. The 27th International Conference on Interactive Collaborative Learning (ICL2024) and 53rd Conference of International Society for Engineering Pedagogy (IGIP) which took place in Tallinn, Estonia, between 24 and 27 September 2024, was the perfect place where current trends in higher education were presented and discussed. IGIP conferences have been held since 1972 on research results and best practices in teaching and learning from the point of view of engineering pedagogy science. ICL conferences have been held since 1998, being devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in learning and Engineering Pedagogy. In this way, the authors try to bridge the gap between pure scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc.

Global Contract Law in the Middle East and North Africa Mohamed Ismail, 2024-08-01. This book comprehensively covers the interplay between cultural and legal globalization and the impact this has on contract law, with a particular focus on state contracts within the MENA region. The book discusses the roles assumed by Supreme Courts in Egypt and MENA countries in creating unified principles of international contract law in states' contracts, which are

consistent with international commercial contracts principles It makes a powerful argument for further harmonization of contract law in the area and how this can be achieved The book forms a case study of how international harmonization can be achieved through a number of routes such as codification digitalization of processes and contracts private public arbitration and further use of international instruments It also considers the implications of comparative European law convention law and other legal domains particularly international standards on contract law in the MENA region The book suggests how international legal standards can be integrated within contract law and how a harmonious contract law framework can thus be achieved Through analyzing ICSID case law the book argues that unification of contract law principles in the MENA region is a considerable step towards achieving legitimate expectations of foreign investors It argues further that global contract law is underway The book will be of interest to students and scholars in the field of international contract law public law and international law in Egypt and MENA countries
