Electronic Library Services Choosing the Library Future K. Ecelbarger,1990 *E-books in Libraries* Kate Price, Virginia Havergal,2011 Despite the fact that e books have been in existence for decades in various guises and added to library collections for several years now there has been a noticeable lack of published manuals on the subject This is doubtless owing to the rapidly evolving nature of the market There is now a plethora of different types of digital object that may be termed e books and a bewildering number of business and access models to match Moreover the pace of change shows no sign of abating but there is an increasing amount of popular interest in e books and what is needed is practical information to assist library and information professionals managing collections of e books and doing their best to inform their users right now The book is divided into five parts The production and distribution of e books Planning and developing an e book collection Delivering e books to library readers Engaging readers with e books The future of e books Virginia Havergal BA Hons MSc MEd FIFL is a Learning Centres and e Resources Manager for Petroc a further education college in Devon Prior to this role she was an e Learning Advisor with JISC with a particular focus on Learning Resources Kate Price BA Hons MA MCLIP is Head of E Strategy and Resources at the University of Surrey

Electronic Consumer

Contracts in the Conflict of Laws Zheng Sophia Tang,2009-09-09 The application of private international law to electronic consumer contracts raises new complex and controversial questions It is new because consumer protection was not a private international law concern until very recently and e commerce only became an important commercial activity within the last ten years E consumer contracts generate original questions which have not been considered under traditional private international law theories It is complex because it has to deal both with difficulties raised by consumer contracts and the challenges of e commerce Reasonable resolutions to consumer contracts may prove inappropriate in e commerce while effective approaches to resolving private international law problems in e commerce may be improper for consumer contracts It is controversial because it concerns the conflicting interests of consumers and businesses in a fast moving commercial environment a fair balance is therefore hard to achieve Without proper solutions provided by private international law consumers will not be confident about purchasing online and businesses will face unreasonable risk and participation costs in e commerce Updated and properly designed private international law rules are essential to the further development of e commerce This book aims to provide an answer to the urgent requirement for legal certainty security and justice in e consumer contracts It is primarily concerned with existing approaches to jurisdiction and choice of law issues in e consumer contracts in the European Community and England but some typical approaches in other jurisdictions are also examined Based on the analysis and the comparative study of the existing law the book seeks to provide a proposal as to what the law should be in order to provide certainty to both parties to provide reasonable protection to consumers and to promote the development of e commerce
