Electroweak Processes In External Active Media Springer Tracts In Modern Physics:

Electroweak Processes in External Active Media Alexander Kuznetsov, Nickolay Mikheev, 2014-07-08 Expanding on the concept of the authors previous book *Electroweak Processes in External Electromagnetic Fields* this new book systematically describes the investigation methods for the effects of external active media both strong electromagnetic fields and hot dense plasma in quantum processes Solving the solar neutrino puzzle in a unique experiment conducted with the help of the heavy water detector at the Sudbery Neutrino Observatory along with another neutrino experiments brings to the fore electroweak physics in an active external medium It is effectively demonstrated that processes of neutrino interactions with active media of astrophysical objects may lead under some physical conditions to such interesting effects as neutrino driven shockwave revival in a supernova explosion a cherry stone shooting mechanism for pulsar natal kick and a neutrino pulsar It is also shown how poor estimates of particle dispersion in external active media sometimes lead to confusion The book will appeal to graduate and post graduate students of theoretical physics with a prior understanding of Quantum Field Theory QFT and the Standard Model of Electroweak Interactions as well as to specialists in QFT who want to know more about the problems of quantum phenomena in hot dense plasma and external electromagnetic fields *Electrodynamics of Conducting Dispersive Media* Babak Shokri, Anri A. Rukhadze, 2019-12-27 This book presents a sequential representation of the electrodynamics of conducting media with dispersion In addition to the general electrodynamic formalism specific media such as classical nondegenerate plasma degenerate metal plasma magnetoactive anisotropic plasma atomic hydrogen gas semiconductors and molecular crystals are considered The book draws on such classics as *Electrodynamics of plasma and plasma like media* Silin and Rukhadze and *Principles of Plasma Electrodynamics* Alexandrov Bogdankevich and Rukhadze yet its outlook is thoroughly modern both in content and presentation including both classical and quantum approaches It explores such recent topics as surface waves on thin layers of plasma and non dispersive media the permittivity of a monatomic gas with spatial dispersion and current driven instabilities in plasma among many others Each chapter is equipped with a large number of problems with solutions that have academic and practical importance This book will appeal to graduate students as well as researchers and other professionals due to its straight forward yet thorough treatment of electrodynamics in conducting dispersive media *Electroweak Interactions.
