China's Regional Relations in Comparative Perspective Steven F. Jackson, 2018-02-06 China's relations with its neighbors have evolved since 1949 and in the 21st century many scholars argue that China's rising power has led it to be increasingly domineering over those smaller countries in Northeast Southeast Central and South Asia The evolution of China's regional relations needs to be examined comprehensively since China counts twenty seven countries as its neighbors large and small While China's official policy toward all of these countries is to treat them as good neighbors and partners some of these relationships have been spectacularly deteriorating while others have been quietly improving over the last two decades Jackson takes a comparative foreign policy approach and compares China's status as a regional hegemon with the United States Russia India Brazil South Africa and Nigeria The result is a broader theory as to why regional powers are sometimes intimidating and at other times accommodating An important contribution to studies on China this book will prove useful to scholars and students in Chinese and Asian foreign policy comparative foreign policy and international relations

Industrial Tree Plantations and the Land Rush in China Yunan Xu, 2020-03-12 This book analyses the political and economic causes mechanisms and impacts of the industrial tree plantation boom in China In the past two decades the industrial tree plantation sector has been expanding rapidly in China especially in Guangxi Province Based on extensive primary data this book concentrates on the political economy of the sector's expansion with a focus on the recent and dramatic agrarian transformation involving the land labour nexus the impact on villagers livelihoods the role of the state and political reactions from below The book questions the stereotypical portrayal of local communities as the excluded villager Instead it demonstrates that this is a much more complex issue with varying levels of passive and active forms of inclusion and exclusion within local communities While most literature focuses on crop booms for food and biofuel production the industrial plantation sector has largely been overlooked despite it being one of the biggest sectors in the current rush for land Filling this lacuna this book also reveals

that while China has traditionally been painted as a major land grabber and consumer of crop booms it is also a destination of foreign investment In doing so the book highlights how large scale foreign land deals can also take place in traditional grabber countries like China which feeds into the wider debates about global land politics and resource grabbing This book will be of great interest to students and scholars of land grabbing rural development and agrarian transformations as well as Chinese development
