Reganit, 2015 *Sexual Selection and the Origins of Human Mating Systems* Alan F. Dixson, 2009-05-15 Comparative analyses of the anatomy reproductive physiology and behaviour of extant primates and other mammals can offer important insights into the origins of human sexual behaviour allowing us to reconstruct the origins of human mating systems the evolution of sexual attractiveness patterns of mate choice and copulatory behaviour Sexual Selection and the Origins of Human Mating Systems provides a modern synthesis of research on the evolution of human mating systems bringing together work on reproductive physiology behavioural biology anthropology primatology palaeontology evolutionary psychology and sexological research The approach taken is genuinely cross disciplinary in scope and provides a fascinating account of the effects of sexual selection upon human evolution in the light of the latest advances in the field The Integrative Neurobiology of Affiliation Carol Sue Carter, I. Izja Lederhendler, Brian Kirkpatrick, 1999 This book examines the biological especially the neural substrates of affiliation and related social behaviors Affiliation refers to social behaviors that bring individuals closer together This includes such associations as attachment parent offspring interactions pair bonding and the building of coalitions Affiliations provide a social matrix within which other behaviors including reproduction and aggression may occur While reproduction and aggression also reduce the distance between individuals their expression is regulated in part by the positive social fabric of affiliative behavior Until recently researchers have paid little attention to the regulatory physiology and neural processes that subserve affiliative behaviors The integrative approach in this book reflects the constructive interactions between those who study behavior in the context of natural history and evolution and those who study the nervous system The book contains the partial proceedings of a conference of the same title held in Washington DC in 1996 The full proceedings was published as part of the Annals of the York Academy of Sciences **Teacher Education** Gloria G.
