sorties hors du corps sont une perturbation globale de cette carte Le neuropsychologue Olaf Blanke a découvert qu'il était possible de générer des sorties hors du corps en stimulant électriquement le carrefour temporo pariétal droit Il semblerait par conséquent que cette zone spécifique du cerveau joue un rôle important dans notre sensation d'être situé dans notre corps CE QU'EN PENSE LA CRITIQUE Le livre passe en revue les mythes les plus répandus de notre époque la zone 51 le triangle des Bermudes les prédictions de Nostradamus la divination et offre du matériel critique Mais l'intérêt du livre vient plutôt de la manière d'aborder ces problématiques Luniver Babelio Un honnête livre de critique scientifique de phénomènes paranormaux Les auteurs détaillent une vingtaine de mythes de ce domaine le triangle des Bermudes Nostradamus les chirurgiens philippins l'expérience de Philadelphie etc benleb Babelio PROPOS DE L'AUTEUR Michel Leurquin est enseignant Il applique la rigueur scientifique à l'Histoire et est l'auteur de Pour en finir avec les mythes de l'Histoire aux éditions Jourdan Jean Michel Abrassart est docteur en psychologie Passionné de zététique il enquête sur le vrai et le faux dans le monde du paranormal

The Professor in the Cage Jonathan Gottschall,2015-04-14 An English professor begins training in the sport of mixed martial arts and explores the

science and history behind the violence of men When a mixed martial arts MMA gym moves in across the street from his office Jonathan Gottschall sees a challenge and an opportunity Pushing forty out of shape and disenchanted with his job as an adjunct English professor part of him yearns to cross the street and join up The other part is terrified Gottschall eventually works up his nerve and starts training for a real cage fight He s fighting not only as a personal test but also to answer questions that have intrigued him for years Why do men fight And why do so many seemingly decent people like to watch In *The Professor in the Cage* Gottschall s unlikely journey from the college classroom to the fighting cage drives an important new investigation into the science and history of violence Mixed martial arts is a full contact hybrid sport in which fighters punch choke and kick each other into submission MMA requires intense strength endurance and skill the fights are bloody brutal and dangerous Yet throughout the last decade cage fighting has evolved from a small time fringe spectacle banned in many states to the fastest growing spectator sport in America But the surging popularity of MMA far from being new is just one more example of our species insatiable interest not just in violence but in the rituals that keep violence contained From duels to football to the roughhousing of children humans are masters of what Gottschall calls the monkey dance a dizzying variety of rule bound contests that establish hierarchies while minimizing risk and social disorder In short Gottschall entered the cage to learn about the violence in men but learned instead how men keep violence in check Gottschall endures extremes of pain occasional humiliation and the incredulity of his wife to take us into the heart of fighting culture culminating after almost two years of grueling training in his own cage fight Gottschall s unsparing personal journey crystallizes in his epiphany and ours that taming male violence through ritualized combat has been a hidden key to the success of the human race Without the restraining codes of the monkey dance the world would be a much more chaotic and dangerous place
