Geomorphology and Land Management in a Changing Environment Duncan F. M. McGregor, Donald A. Thompson, 1995-06-20

Geomorphology and Land Management in a Changing Environment Edited by Duncan F M McGregor and Donald A Thompson Royal Holloway University of London UK Geomorphology and Land Management in a Changing Environment highlights the practical application of geography to environmental management through examination of the ways in which geomorphology is relevant to and contributes to proper management of land resources Increasingly effective land use is seen as dependent on the integration of geomorphological principles and practice within the decision making process The book elucidates the environmental effects of land management practices in terms of the geomorphological systems in which they take place and in the context of an environment subject to uncertainty and change It critically reviews the progress of applied

geomorphology in addressing the issues of practical applicability of geomorphology and then focuses on four major themes within this interaction ground instability and land management the effect of land use on the hydrological and erosional response of geomorphological systems modelling geomorphological response to environmental change and geomorphological aspects of the management of environmental risk By integrating a wide range of case studies from the developed and the developing world the book offers a distinctive insight into the range and utility of geomorphological research and pointers for environmental planners and decision makers at all levels

The Earth Harm J. de Blij, 1995 Since the publication of the last edition of this popular book the world's political geography has changed dramatically The refugee population has mushroomed Migrations relocate millions every year Onslaughts on tropical forests continue and overexploitation threatens maritime resources This edition has been completely revised to reflect these transformations The geography dimension has been strengthened through the expansion of material on Earth origins crustal evolution and erosional processes Increased attention is given to such topics as climate change weather extremes biogeography and resource questions The second half has been recast notably in the urban economic and political chapters The cartography is totally new and photographs are drawn from the author's field collection This text includes full color art and design and is organized into 30 brief eight to ten page chapters
