Frasher,2013-09-05 With original archival documents and interviews from the US and Europe Michelle Frasher brings the reader into the negotiating room with American German and French officials as they confronted the collapse of the Bretton Woods monetary system and made decisions that affected the course of European integration and the contemporary neoliberal order She identifies crisis as the catalyst for change in international monetary policies but argues that the causes of crisis originated from a multitude of factors such as market speculation American hegemony institutional flaws and ideational conflicts among the leaders themselves Far from a planned and consensual process this book shows that the transformation to neoliberalism was riddled with discord and fret with trial and error She argues that the resulting currency regime allowed governments to entrench themselves in national interests and facilitated the marketization of the state where states have become both clients and participants in the financialized global economy to the detriment of international stability Frasher's is the first work to connect the 1960s and 1970s to the difficulties of inter state and inter market cooperation that have plagued the system in the last decades and it puts the 2008 debacle into historical perspective

Japan's Environmental Politics and Governance Yasuo Takao,2016-11-03 Environmental issues stretch across scales of geographic space and require action at multiple levels of jurisdiction including the individual level community level national level and global level Much of the scholarly work surrounding new approaches to environmental governance tends to overlook the role of sub national governments but this study examines the potential of sub national participation to make

policy choices which are congruent with global strategies and national mandates This book investigates the emerging actors and new channels of Japan s environmental governance which has been taking shape within an increasingly globalized international system By analysing this important new phenomenon it sheds light on the changing nature of Japan s environmental policy and politics and shows how the links between global strategies national mandates and local action serve as an influential factor in Japan s changing structures of environmental governance Further it demonstrates that decision making competencies are shared between actors operating at different levels and in new spheres of authority resulting from collaboration between state and non state actors It highlights a number of the problems challenges and critiques of the actors in environmental governance as well as raising new empirical and theoretical puzzles for the future study of governance over environmental and global issues Finally it concludes that changes in the tiers and new spheres of authority are leading the nation towards an environmentally stable future positioned within socio economic and political constraints Demonstrating that bridging policy gaps between local action national policy and global strategies is potentially a way of reinventing environmental policy this book will be of interest to students and scholars of Environmental Studies
