Acs,2011 While composite indicators have becoming popular in many fields over the last two decades the Global Entrepreneurship and Development Index GEDI is the first complex index focusing on the multidimensional quality rather than the quantity aspects of entrepreneurship GEDI is similar to other indices having a complex structure consisting of variables 31 pillars 14 and sub indices 3 However the GEDI methodology differs from the others in two important respects 1 it combines individual and institutional variables and 2 it considers the interdependencies of the system For the interdependencies we developed a Penalty for Bottleneck PFB methodology The central tenet of the PFB is that the performance of the system depends on the weakest link Higher scoring pillars cannot exhibit their full effect on the performance of the system because of the bottleneck The uniqueness of this methodology is that the elements of the system are only partially substitutable with each other *Global Entrepreneurship Index 2015* Zoltan Acs,László Szerb,Erkko Autio,2014-09-20 The Global Entrepreneurship Index both captures the context features of entrepreneurship and fills a gap in the measurement of development Building on recent advances in entrepreneurship and economic development the authors have created an index that offers a measure of the quality of the business formation process in 130 of the most important countries in the world The authors expertly capture the contextual feature of entrepreneurship by focusing on entrepreneurial attitudes entrepreneurial abilities and entrepreneurial aspirations The data and their contribution to the business formation process are supported by three decades of research into entrepreneurship across a
