

Document Splitting Configuration – Document type

- Every business transaction that is entered is analyzed during the document splitting process. In this process, the system determines which splitting rule is applied to the document. In order for the system to determine the splitting rule, you must assign a business transaction variant to each document type.
- To ensure that a splitting rule is used appropriately, the relevant documents must meet certain requirements. These requirements relate in particular to certain item categories that either must or must not be available. This information is specified for each business transaction variant and is checked against the current document during posting. If the document does not meet these requirements, the system rejects the posting.
