is about new bodies Stones springs plants and animals materialize out of human origins to create a world of hybrid objects which retain varying degrees of human subjectivity while taking on new physical form In bending the boundaries of known categories of being these hybrid entities reveal both the porousness of human and other agencies as well as the dangers released by their fusion Metamorphosis unsettles the category of the human within the complex ecologies that make up the world as we know it Drawing on a range of modern environmental theorists and approaches the contributors to this volume trace how the Metamorphoses models the relationship between humans and other life forms in ways that resonate with the preoccupations of contemporary eco criticism They make the case for seeing the worldview depicted in Ovid s poem as an exemplar of the premodern ecological mindset that contemporary environmental thought seeks to approximate They also highlight critical moments in the history of the poem s ecological reception including reflections by a contemporary poet as well as studies of Medieval and Renaissance responses to Ovid
