

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health of sedentary middle-aged men. The subjects were 20 men, aged 40-50 years, who were sedentary and had no history of cardiovascular disease. They were randomly assigned to either a control group or a training group. The training group participated in a 12-week program of aerobic exercise, three times per week, for 45 minutes per session. The control group did not participate in any exercise program. Physical fitness was measured at baseline and at the end of the 12-week program using a variety of tests, including a maximal aerobic capacity test, a submaximal aerobic capacity test, and a series of strength and endurance tests. Health was measured using a series of questionnaires that assessed lifestyle factors, such as diet, smoking, and alcohol consumption, as well as medical history and current health status. The results of the study showed that the training group had significantly higher levels of physical fitness and better health status than the control group at the end of the 12-week program. These findings suggest that a 12-week training program can improve physical fitness and health in sedentary middle-aged men.

Il sito di Santa Giulitta e l'Alta Val Tanaro Paolo Demeglio, 2019-12-20 L Alta Val Tanaro e

in particolare il sito di Santa Giulitta nel comune di Bagnasco CN iniziano a disvelarsi nella loro multiforme complessità. Infatti da un lato il fulcro dell'indagine costituito dall'insieme di edifici e ruderi che testimoniano il susseguirsi di un elemento fortificato di origine altomedievale forse bizantino e di un complesso religioso che a partire da un momento che si colloca tra fine dell'XI e l'inizio del XII secolo fino a oggi è stato importante luogo di devozione per la comunità che si riuniva e ancora si riunisce intorno al culto dei Santi Giulitta e Quirico. Ma dall'altro lo studio a cura della Scuola di Specializzazione in Beni Architettonici e del Paesaggio del Politecnico di Torino che con questo volume rinnova la sua collana ha analizzato vari aspetti della valle nella sua interezza con ottica multidisciplinare e in una dinamica di lungo periodo tra l'età etrusca e l'epoca contemporanea dai dati archeologici alle emergenze architettoniche e artistiche dal tessuto insediativo ai centri produttivi dalle caratteristiche geomorfologiche al patrimonio arboreo dai siti industriali dismessi alle ipotesi di valorizzazione del territorio.

Questo volume è il risultato di quattro diversi seminari che hanno rappresentato un'occasione unica per condividere i risultati degli ultimi anni di ricerche archeologiche e topografiche condotte all'interno delle regioni comprese tra le due sponde dell'Adriatico centrale. Sono stati coinvolti ricercatori che si occupano o si sono occupati di queste tematiche negli attuali territori costieri di Emilia Romagna, Marche, Abruzzo, Dalmazia e Illiria. Le recenti ricerche sembrano indicare che diversi fenomeni di trasformazione della cultura materiale e delle scelte insediative sono influenzati direttamente dai continui cambiamenti politici e dalle diverse influenze economiche e culturali che caratterizzano le zone occupate dai barbari rispetto a quelle sotto il controllo romano-bizantino. Nei contributi raccolti in questa occasione vengono prese in esame sintesi regionali e attraverso la presentazione di singoli contesti di studio le forme degli insediamenti e gli aspetti della produzione e della circolazione dei prodotti ceramici e di tutti i prodotti artigianali in questo periodo di crisi. This volume is the result of four seminars that represented a unique opportunity to share the results of the most recent archaeological and topographical research conducted in the regions on the two shores of the central Adriatic Sea. The contributors include specialists who have been involved in excavations or who have researched archaeological topics in the coastal territories of Emilia Romagna, Marche, Abruzzo, Dalmatia and Illyria. Recent research seems to indicate that different phenomena relating to the transformation of material culture and settlement choices were directly influenced by the continuous political changes and the various economic and cultural influences that characterised the areas occupied by barbarians compared to those under Roman-Byzantine control. The papers here collected through regional summaries and through the presentation of individual study contexts examine the forms of settlements and aspects of the production and circulation of ceramics and other craft products during this period of crisis.
