Dardanelles to Oran Arthur J. Marder,2015-08-15 This collection of essays was first published in 1974 and the fact that it remains relevant today is a testament to Marder s legacy as arguably the greatest naval historian of the 20th century

Readability is part of what made Marder such an excellent historian and it is displayed perfectly in this collection Focusing less on abstract forces and more on human influence Marder creates a book as accessible to the layman as it is interesting to the historian *The Aeroplane* ,1917 *2005 Gamer's Almanac* Sean Carton,2004 **Aeroplane** ,1915 **The Royal**

Navy's Air Service in the Great War David Hobbs,2017-09-30 In a few short years after 1914 the Royal Navy practically invented naval air warfare not only producing the first effective aircraft carriers but also pioneering most of the techniques and tactics that made naval air power a reality By 1918 the RN was so far ahead of other navies that a US Navy observer sent to study the British use of aircraft at sea concluded that any discussion of the subject must first consider their methods Indeed by the time the war ended the RN was training for a carrier borne attack by torpedo bombers on the German fleet in its bases over two decades before the first successful employment of this tactic against the Italians at Taranto Following two previously well received histories of British naval aviation David Hobbs here turns his attention to the operational and technical achievements of the Royal Naval Air Service both at sea and ashore from 1914 to 1918 Detailed explanations of operations the technology that underpinned them and the people who carried them out bring into sharp focus a revolutionary period of development that changed naval warfare forever Controversially the RNAS was subsumed into the newly created Royal Air Force in 1918 so as the centenary of its extinction approaches this book is a timely reminder of its true significance
