Turning Professors Into Teachers Joseph Katz, Mildred Henry, 1993 A really thoughtful and skillful examination based on two research projects conducted between 1978 and 1987 which involved fifteen institutions of the ways in which faculty and students think and learn offering a concept of undergraduate teaching as a lifelong art that involves the continuous interaction of professors and students Annotation copyrighted by Book News Inc Portland OR **School Library Journal** .2008 Catalog Pikes Peak Community College, 2017 Handbook of Research on Faculty Development for Digital Teaching and Learning Elçi, Alev, Beith, Linda L., Elçi, Atilla, 2019-05-31 Faculty development is currently practiced in a variety of approaches by individuals committees and centers of excellence More research is needed to draw better benefit from these approaches in the impending digital world by taking advantage of digitally enabled teaching and learning The Handbook of Research on Faculty Development for Digital Teaching and Learning offers holistic and multidisciplinary approaches to enhancing faculty effectiveness in teaching boosting motivation extending knowledge expanding teaching behaviors and disseminating skills in digital higher education settings Featuring a broad range of topics such as faculty learning communities FLCs virtual learning environments and professional development this book is ideal for educators educational technologists curriculum developers higher education staff school administrators principals academicians practitioners and graduate students Community College Journal ,2003 Developing Faculty Learning Communities at Two-Year Colleges Susan Sipple, Robin Lightner, 2023-07-03 This book introduces community college faculty and faculty developers to the use of faculty learning communities FLCs as a means for faculty themselves to investigate and surmount student learning problems they encounter in their classrooms and as an effective and low cost strategy for faculty developers working with few resources to stimulate innovative teaching that leads to student persistence and improved learning outcomes Two year college instructors face the unique challenge of teaching a mix of learners from the developmental to high achievers that requires using a variety of instructional strategies and techniques Even the most experienced teachers can find this diversity demanding Faculty developers at many two year colleges still rely solely on the one day workshop model that while useful rarely results in sustained student centered changes in pedagogy or the curriculum and may not be practicable for the growing cohort of part time faculty members By linking work in the classroom with scholarship and reflection FLCs provide participants with a sense of renewed engagement and stimulate collegial exploration of ways to

achieve educational excellence FLCs are usually faculty instigated and cross disciplinary and comprise groups of six to fifteen faculty that work collaboratively through regular meetings over an extended period of time to promote research and an exchange of experiences foster community and develop the scholarship of teaching FLCs alleviate burnout and isolation promote the development testing and peer review of new classroom strategies or technologies and lead to the reenergizing and professionalization of teachers This book introduces the reader to FLCs and to the Scholarship of Teaching and Learning offering examples of application in two year colleges Individual chapters describe among others an FLC set up to support course redesign an Adjunct Connectivity FLC to integrate part time faculty within a department and collaborate on the curriculum a cross disciplinary FLC to promote student self regulated learning and improve academic performance and persistence a critical thinking FLC that sought to define critical thinking in separate disciplines examine interdisciplinary cross over of critical thinking and measure critical thinking more accurately an FLC that researched the transfer of learning and developed strategies to promote students application of their learning across courses and beyond the classroom Each chapter describes the formation of its FLC the processes it engaged in what worked and did not and the outcomes achieved Just as when college faculty fail to remain current in their fields the failure to engage in continuing development of teaching skills will equally lead teaching and learning to suffer When two year college administrators restrain scholarship and reflection as inappropriate for the real work of the institution they are in fact hindering the professionalization of their teaching force that is essential to institutional mission and student success When FLCs are supported by leaders and administrators and faculty learn that collaboration and peer review are valued and even expected as part of being a teaching professional they become intrinsically motivated and committed to collaboratively solving problems setting the institution on a path to becoming a learning organization that is proactive and adept at navigating change **Faculty Development** Farrell Hoy Jenab, Heidi L. Hallman, 2021-11-15 Faculty Development Creating a Collaborative Culture in Community Colleges addresses how faculty developers work with changes and challenges in teaching within the community college context Using a multi case study design based on semi structured interviews document analysis focus groups and surveys the book examines faculty development within six community college contexts Three of these case studies conducted before the Covid 19 pandemic attended to how the Scholarship of Teaching and Learning SoTL and Faculty Learning Communities FLCs were pillars for faculty development The other three case studies feature the pivot that faculty developers and faculty made at their institutions in response to the COVID 19 pandemic In these cases it is seen how faculty development shifts from long term sustained initiatives such as SOTL and FLCs to just in time JiT faculty development as well as virtual and collaborative faculty development As teaching models continue to evolve and faculty development takes hold in community colleges this book features the role of collaboration as an essential component of faculty development as well as what supports exist within the community college context to provide faculty with continual professional development **University and School**

Connections Irma N. Guadarrama, John Ramsey, Janice L. Nath, 2008-06-01 The need for strengthening the connections between university based teacher education programs and schools has never been greater in an era where standards and accountability systems often play centric roles in practically all aspects of the education field Within this context university educators and school practitioners have increasingly focused their attention on how professional development schools produce the multiplicity of outcomes that address the exigencies of quality programs for educating teachers and improving school achievement In keeping with the mission of producing a collection of papers that inform enlighten and motivate readers Volume 3 of the Professional Development Schools book series provides practitioners and researchers with articles on a substantial variety of themes on the most recent developments of the field Among the thematic threads that organize Volume 3 are 1 using the national standards to examine and evaluate PDSs 2 implementation development and leadership issues relevant to beginning and experienced PDSs 3 using innovative means for student assessments and mentoring in preservice education within a PDS context 4 the impact of PDSs on teacher education and student achievement and 5 cases of PDSs and the value of lessons learned Volume 3 is similar to the previous two volumes in that it includes both practitioner and researcher strands however the authors in the current volume carry a sense of maturity and exudes a tone of confidence in their voice Professional development schools research is an important aspect of teacher education The collection of articles in Volume 3 contribute to our understanding of their essential qualities and offer assurance that innovation change and quality are building blocks in professional development schools **Library & Information Science Abstracts**, 2006

Learning and Development Sharon L. Silverman, Martha E. Casazza, 2000 The authors pull off an impressive double They synthesize an enormous amount of relevant research on learning and development while also making clear the connections this research has for practice Written in a helpful and accessible style and full of case studies applications instruments and vignettes of practice the book will be an invaluable resource for college teachers at any level Stephen Brookfield Distinguished Professor University of St Thomas Effectively integrating the perspectives of a director of a university learning assistance center and a scholar in the area of developmental education Silverman and Casazza have written an important book It should be read by anyone concerned with the academic success of the increasingly diverse population of undergraduates in colleges and universities Ernest Pascarella Petersen Professor of Higher Education University of Iowa Comprehensive yet easy to follow Learning and Development is designed to help faculty student affairs professionals and other educators understand how students learn and what they can do to foster student achievement Sharon Silverman and Martha Casazza reveal how diverse developmental needs such as lack of self esteem or cultural alienation can be at the root of a student s learning difficulties They draw from the latest theory and research to explore the critical connection between learning and development in six key areas 1 self and identity 2 motivation 3 interaction with the environment 4 ways of knowing 5 learning styles and preferences and 6 self regulation and goal setting The authors also present six case studies to

show how educators can assess and resolve learning problems while enriching and advancing their own teaching expertise Written in clear nontechnical language Learning and Development provides useful systematic approaches for making connections between teaching and learning **Creating Connections in Teaching and Learning Lindy Abawi, Joan** Conway, Robyn Henderson, 2011-12-01 This book explores the wide range of contexts in which research into creating connections in learning and teaching may take place Creating connections can encompass making links crossing divides forming relationships building frameworks and generating new knowledge The cognitive cultural social emotional and or physical aspects of understanding meaning making motivating acting researching and evaluating are explored as constituent forms of creativity in relation to such connections From this exploration the authors identify varied connective contexts and means which include the learner the educator the organisation and the relevant community. The crossing of divides forming learner educator relationships bringing together diverse groups of learners establishing networks and partnerships among educators and establishing links between organisations and communities are all considered as connections which can be created by and within the learning and teaching dynamic By examining the factors which help to facilitate and or restrict the possibilities for creating connections in educational contexts implications for and outcomes of learning and or teaching arise from the connections created The final chapter of this book will explicate the realisations that have emerged for educators and researchers working to create connections These offer suggestions for future directions and enunciate what and how connections might contribute to both educational institutions and the broader society **Learner-Centered Teaching** Terry Doyle, 2023-07-03 This book presents the research based case that Learner Centered Teaching LCT offers the best means to optimize student learning in college and offers examples and ideas for putting it into practice as well the underlying rationale It also starts from the premise that many faculty are much closer to being learner centered teachers than they think but don t have the full conceptual understanding of the process to achieve its full impact There is sometimes a gap between what we would like to achieve in our teaching and the knowledge and strategies needed to make it happen LCT keeps all of the good features of a teacher centered approach and applies them in ways that are in better harmony with how our brains learn It for instance embraces the teacher as expert as well as the appropriate use of lecture while also offering new effective ways to replace practices that don t optimizing student learning Neuroscience biology and cognitive science research have made it clear that it is the one who does the work who does the learning Many faculty do too much of the work for their students which results in diminished student learning To enable faculty to navigate this shift Terry Doyle presents an LCT based approach to course design that draws on current brain research on cognition and learning on addressing the affective concerns of students on proven approaches to improve student s comprehension and recall on transitioning from teller of knowledge to a facilitator of learning on the design of authentic assessment strategies such as engaging students in learning experiences that model the real world work they will be asked to do when they graduate and on successful communication

techniques The presentation is informed by the questions and concerns raised by faculty from over sixty colleges with whom Terry Doyle has worked and on the response from an equal number of regional national and international conferences at which he has presented on topics related to LCT
